## **Abstracts**

Naturally Advanced Technologies Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Naturally Advanced Technologies Inc. and its competitors. This provides our Clients with a clear understanding of Naturally Advanced Technologies Inc. position in the [Chemical](#) Industry.

The report contains detailed information about Naturally Advanced Technologies Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Naturally Advanced Technologies Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Naturally Advanced Technologies Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Naturally Advanced Technologies Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Naturally Advanced Technologies Inc. business.

### **About Naturally Advanced Technologies Inc.**

Naturally Advanced Technologies Inc., a Cleantech company, focuses on providing textile, composite, biomass and pulping solutions through the process of industrial hemp and other bast fiber crops.

The company's business operations consist of the development and execution of proprietary processing platforms called CRAILAR and CRAiLEX technologies, which are bast fiber processing technologies targeted at the textile, pulping, composite and plastics industries.

#### **Products**

The company is organized into four product silos to develop, test and commercialize various technology platforms. These include

**CRAiLEX Advanced Materials:** (near term development/commercialization) Focused on applications for eco-friendly cellulosic pulp, the Advanced Materials division develops technologies for the processing of these cellulose-based fibers in Pulp and Paper,

Bioplastics, and Performance Apparel industries.

**CRAiLAR Organic Fibers:** (near term development/ commercialization) The Organic Fibers division is responsible for CRAILAR applications in the apparel and textile industries. Using the core fiber from the bast fiber crop, CRAILAR Organic Fibers can be spun into a traditional yarn.

**Bio-fuels:** (long term development/commercialization) This division would be developing biofuels that can be made from hempseed, as well as cellulosic sources like residual fibers.

**Agriculture:** (long term development/commercialization) The Agriculture division is concerned with developing the optimal plants for each type of CRAILAR application.

**CRAILAR and CRAiLEX biomass technology platforms:** Developed in collaboration with the National Research Council of Canada and the Alberta Research Council, the CRAILAR and CRAiLEX biomass technology platforms offer processing and production of industrial hemp for textile, composite material, pulp and paper, and energy markets.

## Markets

The company's primary target markets are the natural yarn, the cellulose pulp and composites markets.

## Strategic Alliances

**National Research Counsel of Canada (NRC):** The company has a collaboration agreement with NRC concerning the continued scientific research and development of the advanced enzyme technology for the extraction and cleaning of industrial hemp fiber for the textile sector.

**Alberta Research Council (ARC):** In 2007, the company entered into a master agreement for technology development with ARC. The purpose of the technology development agreement is to further develop the CRAiLEX Technology for use in textile, composite and pulp applications.

## History

Naturally Advanced Technologies Inc. was founded in 1998.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

### Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

### **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
