Abstracts

Navios Maritime Holdings Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Navios Maritime Holdings Inc. and its competitors. This provides our Clients with a clear understanding of Navios Maritime Holdings Inc. position in the Sea Transportation Industry.

The report contains detailed information about Navios Maritime Holdings Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Navios Maritime Holdings Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Navios Maritime Holdings Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Navios Maritime Holdings Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Navios Maritime Holdings Inc. business.

About Navios Maritime Holdings Inc.

Navios Maritime Holdings Inc., a seaborne shipping and logistics company, focuses on the transport and transshipment of drybulk commodities, including iron ore, coal, and grain. As of December 31, 2009, the company's fleet consisted of 60 vessels, aggregating approximately 6.6 million dwt. It owned 15 Capesize vessels, 13 modern Ultra Handymax vessels, 4 Panamax vessels, and 1 Product Handysize tanker vessel; and operated a fleet of 5 Ultra Handymax, 2 Handysize, 10 Panamax, and 10 Capesize vessels under time charter.

Shipping Operations

Navios Holdings' Fleet: Navios Holdings controls a core fleet of 33 owned vessels and 27 chartered-in vessels.

Owned Fleet: Navios Holdings owns a fleet of 13 Handymax vessels, 15 Capesize vessels, 4 Panamax vessels, and 1 Product Handysize vessel.

Navios Logistics Operations

Navios South American Logistics Inc. (Navios Logistics) offers commercial and technical management services to Navios Partners' fleet which consist of 10 Panamax vessels, 1 Capesize vessel, and 1 Ultra-Handymax vessel. Navios Logistics owns and operates vessels, barges and push boats located mainly in Argentina.

Tanker vessels, barges and push boats operations: Navios Logistics operates different types of tanker vessels, push boats and wet and dry barges for the delivery of a range of products meeting the needs of the market between Buenos Aires, Argentina, and all the ports of the Paraná, Paraguay, Uruguay River System in South America, commonly known as the Hidrovia (Waterway). The Hidrovia passes through five countries, Argentina, Bolivia, Brazil, Paraguay and Uruguay along its 3,442 kilometers and to maritime facilities of the South American coastline.

Fleet: Navios Logistics owns or operates approximately 230 barges and push boats, including three ocean-going product tanker vessels. Navios Logistics' fleet consists of the following: three product tanker vessels (ocean-going vessels), 20 push-boats, 157 dry barges, 44 oil barges, three LPG barges, 2 self-propelled barges and 2 small oil tankers

Navios Logistics acquired six convoys for dry cargo transportation, two product tanker vessels, with an aggregate capacity of 29,000 dwt. The total vessels' capability is 38,000 dwt as of December 31, 2009. In February 2010, Navios Logistics took delivery of Sara H, a 9,000 dwt double hulled product oil tanker, which is chartered out for three years. Barges and self-propelled barges provide a total capacity of 327,500 dwt as of December 31, 2009.

Products transported: Navios Logistics transports through the Hidrovia to maritime facilities of the South American coastline liquid cargo (hydrocarbons such as crude oil, gas oil, naphtha, fuel oil and JP1 and vegetable oils), liquefied cargo (Liquefied Petroleum Gas (LPG)) and dry cargo (cereals, cotton pellets, soy bean, wheat, limestone (clinker), mineral iron, and rolling stones).

Liquid Port and Terminal Operations: In the region of San Antonio, Paraguay, Navios Logistics owns and operates an up-river port terminal containing tank storage for petroleum products, oil and gas. The port facility is used to supply international operators from Paraguay and Bolivia. The business is developed through two main types of operations: purchase and sale of petroleum products and storage and handling services which relate mainly to services of inbound, storage and outbound of liquids and gas, or transporting them directly from the barges to the trucks.

Dry Port and Terminal Operations: Navios Logistics owns and operates the bulk transfer and storage port terminal in Uruguay.

Port Operation: The commodities most frequently handled include grain and grain byproducts, as well as some ores and sugar. The port terminal receives bulk cargoes from barges, trucks, and vessels, and either transfers them directly to drybulk carriers or stores them in its own modern silos for later shipment.

Customers

Fleet: Navios Holdings' customers under charter parties, COAs, and its counterparties under FFAs, include national, regional and international companies, such as BHP Billiton Marketing, Arcelor Mittal, Oldendorff Carriers GmbH & Co, Cargill International SA, COSCO Bulk Carriers Ltd., Mitsui O.S.K. Lines Ltd., Korea Line Corporation, Daichi Chuokisen, STX Pan Ocean Co., Baosteel, Sanko Steamship, and Sangamon Transportation.

Tanker vessels, barges and push boats operations: Navios Logistics's customer base includes petroleum and agricultural companies. Some of the significant customers include Shell Argentina, Shell Paraguay, Esso Petrolera Argentina, a subsidiary of Exxon Mobil Corporation, Cargill, Molinos, Vicentin, Terminales Paraguayas S.R.L, a subsidiary of Petrobras, Petropar (the national oil company of Paraguay), Glencore, Repsol YPF, Repsol YPF Bolivia, and Louis Dreyfus.

Dry Port Terminal: Navios Logistics' port terminal at Nueva Palmira, Uruguay conducts business with customers engaged in the international sales of agricultural commodities, which book portions of the port terminal's silo capacity and transship cargoes through the terminal. In 2009, Agrograin a subsidiary of Archer Daniels Midland group (ADM), Cargill, and Uruagri a subsidiary of Louis Dreyfus (LDC) were the customers.

Competition

The company competes with China Ocean Shipping, China Shipping Group, Mitsui O.S.K. Lines, Kawasaki Kisen, Nippon Yusen Kaisha, Cargill, Pacific Basin Shipping, Bocimar, Zodiac Maritime, Louis Dreyfus/Cetragpa, Cobelfret, and Torvald Klaveness.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?
Rare?
Costly to imitate?
Organized properly?
