Abstracts

NCI Building Systems Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between NCI Building Systems Inc. and its competitors. This provides our Clients with a clear understanding of NCI Building Systems Inc. position in the [Building Products and Construction Materials](#) Industry.

The report contains detailed information about NCI Building Systems Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for NCI Building Systems Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The NCI Building Systems Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes NCI Building Systems Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of NCI Building Systems Inc. business.

About NCI Building Systems Inc.

NCI Building Systems, Inc. manufactures and supplies metal coil coating services, metal building components, and engineered metal buildings systems. The company primarily serves the low-rise non-residential construction market (five stories or less). Its products are used in repair, retrofit and new construction activities, primarily in North America.

The company provides metal coil coating services for commercial and construction applications, servicing both internal and external customers. It supports the needs of diverse customer base, which includes general contractors and sub-contractors, developers, manufacturers, distributors and a network of approximately 5,700 authorized builders across North America.

Segments

The company has operations in three business segments: Metal coil coating; Metal components; and Engineered building systems.

Metal Coil Coating

Products: Metal coil coating consists of cleaning, treating and painting various flat-rolled metal coil material, as well as slitting and/or embossing the coils, before the steel is fabricated for use by various industrial users. Light gauge and heavy gauge steel coils that are painted, either for decorative or corrosion protection purposes, are used in the building industry by manufacturers of metal components and engineered building systems. In addition, these painted steel coils are used by manufacturers of other steel products, such as water heaters, lighting fixtures and ceiling grids. The company cleans, treats, and coats hot-rolled metal coils and light gauge metal for third parties for a variety of applications, including construction products, heating and air conditioning systems, water heaters, lighting fixtures, ceiling grids, office furniture and other products. The company provides both toll coating services and package coating.

Sales, Marketing and Customers: The company's customers include other manufacturers of engineered building systems and metal components, as well as light gauge steel coils for steel mills and metal service centers that supply the painted coils to various industrial users, including manufacturers of engineered building systems, metal components, lighting fixtures, ceiling grids, water heaters, and other products.

The company markets metal coil coating products under the brand names 'Metal Coaters' and 'Metal-Prep' and sells products and services principally to manufacturers of painted steel products and steel mills, as well as to its own metal components and engineered building systems segments

Metal Components

Products: Metal components include metal roof and wall systems, metal partitions, metal trim, doors and other related accessories. These products are used in new construction and in repair and retrofit applications for industrial, commercial, institutional, agricultural and rural uses. Metal components are used in a variety of construction applications, including purlins and girts, roofing, standing seam roofing, walls, doors, trim and other parts of traditional buildings, as well as in architectural applications and engineered building systems.

Purlins and girts are medium gauge, roll-formed steel components, which builders use for secondary structural framing. Its metal components consist of individual components, including secondary structural framing, metal roof and wall systems, and associated metal trims. The company sells directly to contractors or end users for use in the building industry, including the construction of metal buildings. It also stocks and

markets metal component parts for use in the maintenance and repair of existing buildings. Specific component products that the company manufactures include metal roof and wall systems, purlins, girts, partitions, header panels, and related trim and screws. The company also develops and markets products such as Insulated Panel Systems (IPS), Eco-efficient panel systems, Soundwall, Nu-Roof system, and Energy Star cool roofing.

Sales, Marketing and Customers: The company sells metal components directly to regional manufacturers, contractors, subcontractors, distributors, lumberyards, cooperative buying groups, and other customers un

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
