## Abstracts

NetApp, Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between NetApp, Inc. and its competitors. This provides our Clients with a clear understanding of NetApp, Inc. position in the [Computers and Electronic Equipment](#) Industry.

The report contains detailed information about NetApp, Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for NetApp, Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The NetApp, Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your

company's decision-making processes.

In the part that describes NetApp, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of NetApp, Inc. business.

## **About NetApp, Inc.**

NetApp, Inc. provides storage and data management solutions. The company offers solutions for storing, managing, protecting, and archiving business data. It also provides global service and support.

The company's products and services are designed to meet the requirements and service levels of large enterprises and their business applications. It partners with Cisco Systems, Inc., IBM Corporation, Microsoft Corporation, SAP Corporation, Symantec Corporation, and VMware, Inc. to develop integrated solutions that optimize the performance of customers' applications and their infrastructure. In addition, its products have been designed to satisfy the demands of computing and technical data center applications, offering solutions used in the design of semiconductors and automobiles, as well as graphics rendering and seismic exploration.

## **Products**

### **Data ONTAP Software**

The company's Fabric-Attached Storage (FAS) and V-Series storage solutions are based on Data ONTAP, an operating system that supports any mix of storage area network (SAN), network-attached storage (NAS) and Internet Small Computer System

Interface (iSCSI) environments concurrently. This unified storage software platform is compatible with UNIX, Linux, Windows, and Web environments. The Data ONTAP operating system provides the foundation to build a shared storage infrastructure and an enterprise-wide data fabric for the breadth of business applications and data storage and protection requirements.

### Storage Efficiency

The company offers a portfolio of efficiency technologies to its customers. Its technologies include FlexVol technology, which enables storage architectures to achieve higher utilization using flexible volumes that do not require repartitioning of physical storage space; FlexClone technology, which enables data cloning using logical copies that do not require additional physical storage space, and allows for instant replication of data volumes and data sets; and Deduplication technology, which provides the ability to eliminate duplicate data within primary and secondary disk storage environments.

### Storage Management and Application Integration Software

The company's management software family of products provides a range of storage and data management tools. It has four suites of products targeted to different IT administrative roles: Storage Suite, Server Suite, Database Suite, and Application Suite. The software products within these suites are integrated with database and business application software from partners, such as Microsoft, Oracle, SAP, and VMware, to optimize the performance of those applications on its storage systems. The company's product offering extends into data center automation, which provides the capability to monitor service levels, manage performance, and support change management in complex enterprise SAN environments.

### FAS Storage Systems Family

The company's family of networked storage systems provides access to a range of enterprise data for users on various platforms. The FAS 6000, FAS 3000, and the FAS 2000 series of fabric-attached enterprise storage systems are designed to consolidate UNIX, Windows, NAS, iSCSI, SAN, and Web data in central locations running over standard connection types: Gigabit Ethernet, FC, and parallel SCSI (for backup).

### V-Series Family

The company's V-Series is a network-based virtualization solution that consolidates storage from different suppliers behind its data management interface, providing SAN, iSCSI, and NAS access to the data stored in heterogeneous storage arrays. With the V-Series solution, customers are able to: transform existing heterogeneous, multi-vendor storage systems into a single storage pool; simplify storage provisioning and management with Data ONTAP thin provisioning; and lower backup time and space with Data ONTAP Snapshot copies. The V-Series is compatible with the FAS family of storage systems.

### Data Protection Software Products

The company offers a range of integrated data protection solutions for enterprise customer environments: Snapshot technology, which enables online backups of data sets without affecting system performance;

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
