The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of NetObjects, Inc. business.

About NetObjects, Inc.

NETOBJECTS Inc., (the Company) is a provider of software, solutions, and services that enable small businesses to build, deploy and maintain Web sites; conduct online e-business; and enable large enterprises to effectively create and manage corporate intranets.

NetObjects Fusion

NetObjects Fusion is a Web site building tool that offers ease of use as well as sophisticated functionality to meet the demands of the more technically savvy small business customer. The latest version, NetObjects Fusion 5.0 offers drag and drop productivity, as well as the ability to instantly access NetObjects Matrix Services, a suite of essential online services. Earlier versions of NetObjects Fusion are available in nine languages in addition to English, including German, French, Spanish, Chinese, and Japanese.

NetObjects Collage

NetObjects Collage enables a Web production cycle which controls the dynamics involved with creating and managing the growing complexity of Web ever expanding

applications. This platform must enable enterprise-wide collaboration and content contribution, scalable management of both static and dynamic content, existing enterprise application integration, and dynamic application services. NetObjects Collage is designed to meet all these requirements.

NetObjects Matrix Platform

The NetObjects Matrix Platform provides the framework through which service providers can quickly and seamlessly deliver NetObjects Matrix Builder and NetObjects Matrix Services to their small business customers. It combines a best-of-class online Web site builder with a suite of integrated add-on business services. It provides true integration working with the service provider's business model and technical environment--front-end and back. The NetObjects Matrix Platform is highly scalable and reliable, and uses XML and server-side Java to ensure openness and interoperability. The platform also supports multiple publishing standards such as HTML, XML and WML, allowing service providers the opportunity to support multiple devices including PDAs and digital cellular phones. Service providers can customize the NetObjects Matrix Platform to offer unique combinations of online services to better serve the specific needs of their small business customers.

NetObjects Matrix Builder

NetObjects Matrix Builder is an online Web site building tool that gives small businesses online access to the functionality they need to plan, design, build, and maintain their own interactive, revenue-producing Web sites. NetObjects Matrix Builder is a new generation of online builder, providing a unique preview-click-edit approach to building a Web site. With the help of a QuickStart Wizard that walks users step-by-step through the Web building process, and a range of preformatted templates and design styles, small businesses can create professional looking, fully functional business Web sites.

NetObjects Matrix Services

NetObjects Matrix Services is a suite of essential online services to help small companies grow and manage their businesses. These services include list management, forms processing, tracking, and search and site promotion. In addition, there is an intuitive dashboard to manage all of these services. NetObjects Matrix Services are remotely hosted, thus eliminating the need for client-side software which generally requires dedicated IT resources to install, integrate, maintain, and upgrade. The remote hosting model thus saves service providers both time and money.

NetObjects Global Services

NetObjects Global Services is a complete range of services designed to ensure seamless and successful implementation of the NetObjects Matrix Platform by service providers customers. NetObjects Global Services provide integration, customization, installation, configuration, training, and ongoing support. The NetObjects Global Services team works with service providers on everything from the initial project scope to ongoing training and network support to ensure that both the business and technical objectives of their environment are met.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
