## Products

### NetSol Financial Suite

The company develops software systems for the lease and finance industries. Its offerings include its primary global solution, NetSol Financial Suite (NFS), a suite of five software applications, is a solution for the lease and finance industry covering the leasing and finance cycle starting from quotation origination through end of contract. The constituent software applications are:

**Point of Sale (POS):** POS is a front office processing system for companies in the financial sector. It provides a quotation system which also incorporates a simulation for various kinds of financial products using a built-in loan calculation.

**Credit Application Processing System (CAP):** CAP provides companies in the financial sector an environment to handle the incoming credit applications from dealers, agents, brokers, and the direct sales force. LeaseSoft.CAP automatically gathers information from different interfaces like credit rating agencies, evaluation guides, and contract management systems and scores the applications against defined scorecards.

**Contract Management System (CMS):** CMS provides business functionality that enables its users to manage and maintain a contract with the details throughout its life cycle. It provides interfaces with company banks and accounting systems. CMS maintains details of all business partners that do business with the company, including customers, dealers, debtors, guarantors, insurance companies, and banks.

**Wholesale Finance System (WFS):** WFS automates and manages the floor plan/bailment activities of dealerships through a finance company. The design of the system is based on the concept of one asset/one loan to facilitate asset tracking and costing. The system covers credit limit, payment of loan, billing and settlement, stock auditing, online dealer and auditor access, and ultimately the pay-off functions. A separate online add-on module, Dealer & Auditor Access System (DAS), allows dealers to view their limits and asset-wise balances through an interface with the finance company. WFS consists of the following four modules: credit request management module (CRM); loan management module (LMS); stock auditing module (SAS); and billing & settlement module (B&S).

**Fleet Management System (FMS):** FMS is designed to handle fleet management needs. FMS is integrated with CMS and WFS, as well as with any third party contract

management system. FMS' key features include a tracking information on every driver and vehicle; customizable reports; periodic reporting on fleet related aspects; Internet based access to information; integration with third party software; and linkage to GPS for real time tracking.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

### **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

### **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
