The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of New Wave Holdings Ltd. business.

About New Wave Holdings Ltd.

New Wave Technologies Ltd (the Company) was incorporated in Singapore in 1999 as a private limited company. The company's group consists of two Subsidiaries, General Electronics & Instrumentation Corporation (Private) Limited (GEIC) and eplus Technologies Pte Ltd.

GEIC started operations in 1966 as a trader of electrical and electronic components (including marine-related equipments). In 1995, GEIC was acquired by GenLink Technologies. It underwent a management restructuring to focus on target market niches such as the telecommunications and interconnects sectors in the electronics industry and to improve the group's technical capabilities. Currently, GEIC's principal activities include the industrial distribution of active and passive electronic components and the design & development of dedicated application-based projects including professional consultancy, bureau services, turnkey solutions, system integration, customer care services and the provision of online services such as e-business and e-shopping.

eplus Technologies Pte Ltd was set up in August 1999 as an e-commerce and IT services provider to meet the growing demands for e-commerce. eplus Technologies

Pte Ltd is a leading e-enabler helping SMEs in Singapore and Asia Pacific embark on e-commerce solutions for their businesses. Focusing on the company's core competency of web-based Internet application development eplus provides Business-to-Business (B2B) and Business-to-Consumer (B2C) solutions. eplus's comprehensive suite of services includes strategic consultancy work, low-cost advance web hosting, web design, systems integration and ERP applications implementation and hosting.

The Company's three core businesses include the following.

The Company's Component Distribution Division is in the business of sourcing and distributing active and passive electronic components.

The Company's Value Added Distribution Division designs and develops dedicated application- based projects.

The Company's subsidiary company, eplus focuses on providing e-commerce and IT Services and solutions to customers. Services provided by eplus include Business Process Innovation, Internet / Intranet Solutions design, Implementation and Hosting, Information Technology Consulting, Systems and Network Consultancy and Implementation, Enterprise Resource Planning (ERP) Implementation and Hosting and Application Maintenance and Support.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
