Abstracts

NewGen Technologies Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between NewGen Technologies Inc. and its competitors. This provides our Clients with a clear understanding of NewGen Technologies Inc. position in the Industry.

The report contains detailed information about NewGen Technologies Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for NewGen Technologies Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The NewGen Technologies Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and

company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes NewGen Technologies Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of NewGen Technologies Inc. business.

About NewGen Technologies Inc.

NewGen Technologies, Inc., a development stage company, operates as a fuel production and distribution company. The company engages in the development of biofuel blends with proprietary fuel technology that changes the property of fuels to allow more complete combustion.

The company's fuel products include proprietary and complex technology that improves the performance of gasoline and diesel fuels, as well as domestically produced alternative fuels such as Ethanol-based E85 and Biodiesel blends.

The company is in the process of working with a joint venture partner to build and operate a biodiesel plant that is designed to produce 60 million gallons annually in Sandersville, Georgia. This proposed joint venture would be the initial step in its plans to manufacture, process, and distribute biofuels in the U.S. with the intention of increasing a vehicle's operating efficiency while reducing the amount of carbon monoxide, particulates, and nitrous oxides produced.

Terminals

The company owns three terminals which would be used for the blending and

distribution of its alternative fuel products: Spartanburg Terminal located at Spartanburg in South Carolina consisting of 3.8 acres; Columbus Terminal located at Columbus in Georgia consisting of 7.5 acres; and Charlotte Terminal located at Paw Creek in North Carolina consisting of 6.2 acres.

Markets

The company's products are designed for use in all internal combustion engines, spark-ignited (gasoline) and compression-ignition (diesel) opening the entire transportation market for sales and distribution. This market includes automotive, marine, rail, and aviation, a total of approximately 200 billion gallons per year. In addition, the company's products can be utilized in stationary equipment as those used in power generation, home heating, chemical plants and mining.

The company formed a wholly-owned subsidiary, NewGen BioFuels Inc., to focus on investment and strategic partnerships in renewable fuel production ventures, providing ReFuel America's fuel supply & distribution operations with biofuels (ethanol and biodiesel).

Joint Ventures

The company, as of November 30, 2005, formed a joint venture named Actanol BioEngineering, LLC, with Actanol Service, Ltd., a provider of alternative energy and biofuel plant solutions, to conduct the business of design, engineering, contracting, building, staffing and managing the feasibility and operational processes of various types of biofuel plants and agro-refineries.

The company, as of September 26, 2006, formed a joint venture named NewGen Biofuels Asia Pte Ltd (NBA) a company registered in Singapore, with Palmbio Venture Pte Ltd, a company registered in Singapore, for the purpose of conducting the business of manufacturing, processing, storing, marketing, distributing, and selling biodiesel, biodiesel mixtures, and biodiesel byproducts.

Competition

The company's major competitors in the additives market, include Lubrizol, Chevron-Texaco (Oronite), Associated Octel/Octel-Starreon, Infineum, BASF, and Akzo Nobel.

History

NewGen Technologies, Inc. was founded in 2005.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
