term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes NexPrise, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of NexPrise, Inc. business.

About NexPrise, Inc.

NexPrise, Inc. is a seller of business process automation and management applications. The company develops and markets software solutions that can enable manufacturers to rapidly automate key business processes. These solutions complement and expand on currently installed enterprise systems and accommodate ongoing process improvements as companies require meeting their changing business demands.

Product

NexPrise was formed as a private company with intellectual property rights to this technology. The company continued to develop the product and it evolved into the Program Manager and Quote System applications deployed in most of its installed base. In 2002, the company announced the release of the nProcess Platform and a set of configurable process applications that offer improved workflow, efficient integration into multiple data sources, rapid configuration and reconfiguration and a development studio that customers can use to automate their processes.

The company's principal applications are Document Manager, Engineering Change Manager, Supplier Non-Conformance and Corrective Action Manager, Cost Estimation and Quote Manager, Contract Data Manager, Supplier Materials Manager, Action Item

Manager and Management of Change.

System Architecture: The company's solutions include two layers of technology that include:

Infrastructure Layer: This layer is the foundation of the product and provides the product with Internet access, email and database functionality and security. The layer is implemented using standard web servers and supports standard Internet protocols, such as HTTP/ HTTPS and XML.

Application Layer: This layer provides specific functionality and workflow for business applications, such as Engineering Change Manager and Supplier Non-Conformance and Corrective Action Manager.

Customers

The company's customers include Trelleborg-YSH, Inc., Sikorsky Aircraft Corporation, The Boeing Company, Textron Corporation and Decoma International, Inc.

Competition

The company's competitors include MatrixOne or Parametric Technology Corporation (PTC), i2 Technologies, Oracle, or Ariba, Vitria, BEA, and IBM.

History

Nexprise, Inc. was incorporated as Chemdex Corporation in 1997 in Delaware and changed its name to Ventro Corporation in 2000. The company again changed its name to NexPrise, Inc. in 2002.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
