The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of nFinanSe Inc business.

## **About nFinanSe Inc**

nFinanSe Inc. provides stored value cards (SVCs) for various markets, including grocery stores, convenience stores, and general merchandise stores.

### **Products and Services**

The company sells Discover branded, bank-issued reloadable general spend, and gift SVCs. It also sells Visa branded, bank-issued reloadable general spend cards, and American Express branded gift SVCs. These SVCs are sold directly to consumers through its distribution partners' network of retail locations. The company also sells payroll SVCs directly to companies. It has approximately 18,000 retail agent locations where its cards are sold.

**Reloadable General Spend SVC:** This is a prepaid SVC primarily for the unbanked cash-based consumer that is reloadable at nFinanSe Network locations nationwide and is sold at selected retail locations through its prepaid card distributors.

Underbanked/unbanked/cash-based consumers would use the SVC at ATMs and to make purchases wherever Discover and VISA cards are accepted. These products also used to load automated clearing house payroll deposits.

**Gift SVC:** This is a Discover Network-branded SVC and an American Express-branded

SVC that is denominated for set values. These products are retail product sold at retail locations.

**Payroll SVC:** This is a prepaid SVC for the loading of an employee's payroll. The SVC is reloadable through the Web or from the client's payroll department via direct deposit. Payroll distribution targeting companies with various employees that receive payroll and commission checks use these products.

The company is a program sponsor of both Discover Network and Visa-branded SVCs.

### nFinanSe Network

The company has developed its nFinanSe Network, which connects with its load locations. As of January 2, 2010, the company had approximately 84,000 nFinanSe Network locations consisting primarily of Western Union and MoneyGram locations and approximately 14,000 retail agent locations where its cards are sold.

### Business Relationships

**Card Networks:** The company's agreement with DFS Financial Services LLC, Visa U.S.A. Inc., and American Express Inc. permits it to offer SVCs with branded holograms to prospective cardholders through various approved channels.

**Distribution Partners:** The company has executed agreements with prepaid card distributors, including InComm, Coinstar E-Payment Systems, QComm/Emida, WL Petrey, and Now Prepay. These distributors represent approximately 100,000 retail locations that offer its SVCs.

**Third-Party Load Locations:** The company has relationships with Western Union and MoneyGram that allow these two companies to load value on its reloadable SVCs using the nFinanSe Network.

### History

The company was founded in 2000. It was formerly known as Morgan Beaumont, Inc. and changed its name to nFinanSe Inc. in 2006.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
