Such information creates your awareness about principal trends of NICE Systems Ltd. business.

About NICE Systems Ltd.

NICE-Systems Ltd. provides solutions that enable enterprises and security organizations to extract insight from interactions, transactions, and surveillance to drive business performance and ensure safety and security.

The company's solutions enable companies and public organizations to capture, manage, analyze and impact unstructured interaction, as well as transactional data, enabling such entities to comply with internal and governmental regulations, enhance business and operational performance and address security threats while increasing situational awareness.

The company's solutions include integrated, scalable, cross-channel recording platforms, cross-channel real-time analytics and software management applications. These solutions address business processes and risk management, compliance procedures and security needs of enterprises and security organizations.

The company's enterprise customers span various industries, such as financial services, telecommunications, healthcare, outsourcers, retail, media, travel, service providers, utilities and others. Its financial crime solutions primarily serve financial services organizations. The company's security solutions are modified to protect city

centers, transportation systems, critical infrastructure, and enterprise campuses. The company's solutions are deployed at approximately 24,000 customers.

Products

The company's offerings to the enterprise sector include a suite of business solutions that address specific business issues, powered by functional components spanning interaction recording, quality management, cross-channel and real-time interaction analytics, workforce management, performance management and customer feedback. The business solutions capture, analyze and impact customer interactions across various channels, from audio, email and chat to social media and text messaging. The solutions include nine packaged offerings: Customer Churn Reduction, Sales Effectiveness, Customer Experience, Marketing Effectiveness, Collections Optimization, Quality Optimization, First Contact Resolution Optimization, Handle Time Optimization, and Compliance Management. These solutions can be deployed on premise, in a hosted model, or via a managed service, and can be implemented stand-alone or fully integrated with CRM and business intelligence solutions.

The company's financial crime (fraud detection and Anti Money Laundering (AML)), operational risk and compliance solutions for financial institutions are built on the Actimize core software platform, incorporating a graphical development interface and case management dashboard with a real-time analytics detection engine. The company's securities trading and broker sales practices compliance applications identify high-risk activities by monitoring and correlating various data elements including transactions, accounts and trader information, as well as interactions and market activities.

The company's fraud prevention solutions pinpoint suspicious patterns and abnormal behavior amongst large amounts of data to assist in the identification of financial crimes, both internal (such as employee fraud or rogue trading) and external. The company's AML solutions help institutions detect suspicious money transfer activities and money laundering related issues with new accounts (in alignment with Know Your Customer and Customer Due Diligence regulations), as well as combat the financing of terrorism by monitoring transactions against watch and sanction lists to identify the activities of known criminals. The company's AML applications include transaction monitoring and suspicious activity reporting for all types of financial services institutions, including securities, banking, insurance, credit card and money services industries. The company also provides enterprise-wide case management and investigation applications that are used by its clients to aggregate, analyze and investigate risk related cases across the

organization.

The company's security solutions comprise voice platforms and applications, digital video platforms and applications, and lawful interception products. The company's voice platforms an

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
