The Niko Resources Ltd. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Niko Resources Ltd. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Niko Resources Ltd. business.

About Niko Resources Ltd.

Niko Resources, Ltd. engages in the exploration, development and production of natural gas and oil in India, Bangladesh, Pakistan, and Kurdistan.

The company holds interest in three onshore and three offshore blocks in India; three onshore blocks in Bangladesh; four offshore blocks in Pakistan; one onshore block in Kurdistan. The company also has minor interests in oil and gas properties in Canada.

The company's subsidiaries include Niko Resources (Block 9) Limited and Niko (NECO) Limited.

Oil and Gas Properties

India

The company has an interest in one oil and natural gas field (Hazira) and one natural gas block (Surat) that are producing in India. There are also two offshore gas blocks, one offshore oil and gas block and one onshore oil block in India.

Hazira, India: The company operates this field and holds a 33.33% interest therein. The

field is located close to various major industries about 25 kilometers southwest of the city of Surat and covers an area of approximately 50 square kilometers. Gujarat Gas Company Limited (GGCL), the Indian subsidiary of British Gas PLC, owns an 18-inch and an 8-inch gas sales line going from the Hazira Field to residential and industrial users. In addition, Niko and Gujarat State Petroleum Corporation Limited (GSPC) have constructed a 36-inch gas sales pipeline to the local industrial area.

Surat Block, India: In 2001, the company and the Government of India (GOI) executed a production sharing contract (PSC) covering the 419 square kilometer Surat Block located onshore adjacent to the Hazira Field in Gujarat State, India. It has a 100% interest in the Surat Block.

D6 Block, India: In 2000, the company, the GOI and Reliance signed a PSC for the D6. It has a 10% working interest in the block, with Reliance, being the operator, holding the remaining interest. The block is 7,645 square kilometers lying approximately 20 kilometers offshore of the east coast of India. The company's undeveloped reserves in India include the Dhirubhai 1 and 3 discoveries.

NEC-25, India: In 2000, the company, the GOI and Reliance signed a PSC for the NEC-25 block. Niko has a 10% working interest in the block, with Reliance, being the operator, holding the remaining interest. The block comprised 14,535 square kilometers lying offshore adjacent to the east coast of India.

Cauvery Block, India: The company was awarded 100% interest in the Cauvery Block, which is located onshore southeast India in the State of Tamil Nadu, in the NELP-V bidding round. The block has mainly oil potential. The block covers 957 square kilometers and a total of 915 square kilometers of seismic data had been acquired on the block.

D4 Block, India: In 2005, the Government of India, Niko and Reliance signed a PSC for the D4 Block. Niko has a 15% participating interest in the block, with Reliance, being the operator, holding the remaining interest. The Block is 17,050 square kilometres, lying offshore of the east coast of India in the Mahanadi Basin.

Oil and Gas Wells

The Hazira field in India has 9 gross (3.0 net) gas wells and 1 gross (0.3 net) oil wells located offshore, 17 gross (5.7 net) gas wells located on the land based drilling platform and 5 gross (1.7 net) gas wells onshore. It has one gross (0.3 net) well that is an

injector well in Hazira. There are two pipelines, a gas plant and an oil facility at Hazira.

The Surat field in India has 12 gross (12 net) gas wells located onshore, all of which are producing. There is a gas plant at Surat.

Bangladesh

The Company has an interest in two natural gas fields (Feni and Block 9) that are producing in Bangladesh.

Chattak and Feni Gas Fields, Bangladesh: In 1999, the company signed a Framework of Understanding with BAPEX for the evaluation of the Chattak and Feni fields, being natural gas fields onshore Bangladesh. In 2003, a joint venture agreement was entered into between Niko Resources (Bangladesh) Ltd. (a wholly-owned subsidiary of Niko Resources Ltd.) (NRBL) and BAPEX for the joint development of the Chattak and Feni fields (the JVA). The Chattak field is 376 square kilometers and the Feni field is a total of 43 square kilometers in s

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
