## Abstracts

### ABSTRACTS

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business in Niue to later chart its long-term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by Niue PESTEL Analysis:

Political – What opportunities and pressures are brought by Niue political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures in Niue are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects of Niue will work upon the demand for the business's products and operations?

Technological – What impact do Niue technological aspects, innovations, incentives and

barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What Niue laws and legislation will exert influence on the style the business is carried out?

The above Niue PESTEL Analysis is a half-ready report and contents are subject to change. It means that we have all necessary data in our database to prepare the report but need two business days to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price.

## Contents
