The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Noah Holdings Limited business.

About Noah Holdings Limited

Noah Holdings Limited engages in the distribution of wealth management products to the high net worth population in China.

The company's coverage network encompasses regions where high net worth population is concentrated, including the Yangtze River Delta, the Pearl River Delta, and the Bohai Rim. Through this coverage network, the company serves three types of clients: high net worth individuals; enterprises affiliated with high net worth individuals; and wholesale clients, primarily local commercial banks or branches of national commercial banks which distribute wealth management products to their own clients.

Product Choices

The company markets and distributes the following categories of products supplied by third party product providers, based on the underlying assets class: fixed income products, mainly including collateralized fixed income products sponsored by trust companies and other products that provide investors with fixed rates of return; private equity funds products, including investments in private equity funds sponsored by domestic and internal fund management firms; securities investment funds, which are privately raised funds investing in publicly traded stocks; and investment-linked

insurance products.

Client Services

The company's client service consists of services provided on a no-fee basis throughout high net worth individual clients' investment process, including the following aspects:

Financial Planning: The company assigns a relationship manager to each client, who provides the client with day-to-day wealth management recommendations and services. Its relationship managers analyze and assess financial condition, past investment experiences, risk profiles and investment goals of clients and provide them with personalized asset allocation plans. They also provide clients with on-going financial planning consultations and provide recommendations to clients on adjusting their financial plans in response to economic and market conditions.

Asset Allocation: The company assists clients with their asset allocation in accordance with their financial plans risk profiles by introducing them to its product choices and assisting them in making the purchase decision.

Market and Product Intelligence: The company furnishes clients with a variety of proprietary research reports, publications, and information on a regular basis. These include daily newsletters of general market conditions, key stock exchange indices and digests of research reports, weekly product reports introducing current product choices and market analysis, and monthly product reports providing performance statistics of certain products.

History

Noah Holdings Limited was founded in 2005.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
