Such information creates your awareness about principal trends of Nomura Holdings Inc. business.

About Nomura Holdings Inc.

Nomura Holdings, Inc. operates as a financial services company in Japan. As of March 31, 2010, the company operated offices in approximately 30 countries and regions including Japan, the United States, the United Kingdom, Singapore, and Hong Kong through its subsidiaries. The company's customers include individuals, corporations, financial institutions, governments and governmental agencies.

Divisions

The company's divisions include Retail, Wholesale, and Asset Management.

Retail

Retail division conducts business activities mainly for individuals and corporations in Japan through a network of nationwide branches. As of March 31, 2010, the company had 172 branches. The company offers investment consultation services to meet the medium to long term needs of its customers.

Wholesale

Wholesale division consists of Global Markets, Investment Banking and certain other non-Retail operations.

Global Markets: Global Markets consists of three businesses, including Fixed Income, Equities and Asset Finance.

Fixed Income handles mainly debt securities, foreign currencies and commodities as well as related derivatives. Equities focuses on equities and equity-linked derivatives. Asset Finance helps clients raise capital through real estate and asset securitization, financing and other solutions.

The company has full-service offerings in Fixed Income and Equities, with a track record of selling and trading debt securities, stocks, and foreign exchange, as well as derivatives based on these financial instruments, mainly to institutional investors. The company offers execution services based on cutting-edge technologies.

Investment Banking: The company offers a range of investment banking services to a range of corporations, financial institutions, sovereigns, investment funds and others. It targets to develop and fortify solid relationships with these clients on a long term basis by providing them with its resources for each bespoke solution.

Underwriting: The company underwrites offerings of a range of securities and other financial instruments, which include various types of stocks, convertible and exchangeable securities, investment grade debt, sovereign and emerging market debt, high yield debt, structured securities and other securities in Asia, Europe, and other major financial markets. It also arranges private placements and engages in other capital raising activities.

Financial Advisory & Solutions Services: The company provides financial advisory services on business transactions, including mergers and acquisitions, divestitures, spin-offs, capital structuring, corporate defense activities, leveraged buyouts and risk solutions.

Merchant Banking: In Japan, the company operates through wholly owned subsidiaries, including Nomura Principal Finance Co., Ltd. and Nomura Financial Partners Co., Ltd. In Europe, its private equity investments are mainly managed by Terra Firma. The company also makes alternative investments in Europe and investments in venture companies in Japan, Europe, and the United States.

Asset Management

Asset Management business consists of the development and management of investment trusts and investment advisory services, primarily through Nomura Asset Management Co., Ltd. (NAMCO). NAMCO manages various investment trusts, ranging from low risk/low return products to high risk/high return products, and develops new products to respond to various investor needs. Investment trusts are distributed to investors through Nomura Securities Co., Ltd., as well as through financial institutions, such as securities companies (including those outside its group), banks and Japan Post Bank. Investment trusts are also offered in defined contribution pension plans. The company also provides investment advisory services to public pensions, private pensions, governments and their agencies, central banks, and institutional investors.

History

The company was founded in 1925. It was formerly known as The Nomura Securities Co., Ltd. and changed its name to Nomura Holdings, Inc. in 2001.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
