Abstracts

North Australian Diamonds Limited Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between North Australian Diamonds Limited and its competitors. This provides our Clients with a clear understanding of North Australian Diamonds Limited position in the [Metals and Mining](#) Industry.

The report contains detailed information about North Australian Diamonds Limited that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for North Australian Diamonds Limited. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The North Australian Diamonds Limited financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes North Australian Diamonds Limited competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of North Australian Diamonds Limited business.

About North Australian Diamonds Limited

North Australian Diamonds Limited primarily engages in the diamond exploration in Australia. The company primarily focuses on the diamond exploration in the North Kimberley project areas and the Northern Territory. It operates as a subsidiary of Legend International Holdings, Inc.

Properties

MERLIN PROJECT – NORTHERN TERRITORY

The Merlin Project includes Merlin Diamond Mine operations and the surrounding exploration tenements totaling approximately 4,591 square kilometers of the Merlin Kimberlite Field. It includes 14 kimberlite pipes. The combined resource for all diamond pipes at Merlin is 22.46Mt for an average grade of 18.2cpt representing a total contained 4.0Mcts.

MERLIN ORBIT EXPLORATION – NORTHERN TERRITORY

The Merlin Orbit exploration properties include 15 tenements surrounding the mining lease of the former Merlin Diamond Mine and totals approximately 4,550 square kilometers.

Lancelot: The diamond and indicator mineral anomaly is being investigated at a locality some 40km south of Merlin. Various anomalous soil geochemical responses have been identified associated with areas of abundant indicator minerals.

Borrooloola Alluvial Project: The Borrooloola alluvial deposits are situated some 20 square kilometers south of Borrooloola and approximately 100km down drainage of the Merlin mine. Totally 7 diamonds (0.225cts,) were recovered from a 180 tone exploratory sample of gravel.

ARNHEM LAND PROJECT – NORTHERN TERRITORY

The company controls the mineral rights to diamonds over an portfolio of exploration tenements aggregating approximately 26,500 square kilometers within the Arnhem Land region of the Northern Territory.

The company is a party to a farm-in agreement with De Beers Australia Exploration Limited (DBAE) whereby it might earn a 100% interest for all commodities in tenements with a total project area of 13,200 square kilometers in the Arnhem Land region of the Northern Territory. It has a contractual right to obtain an 80% interest in 2 tenements covering approximately 2000 square kilometers of land in the prospective western region of Arnhem Land.

YAMBARRA PROJECT – NORTHERN TERRITORY

The company is a party to a farm-in agreement with Rio Tinto whereby it might earn 100% interest for diamonds in tenements in the Daly River region of the Northern Territory. These tenements have a project area of 9,100 square kilometers.

Kimberley Projects

The company, within its North Kimberley project area, has identified a total resource of 1.57M carats, contained within the Ashmore and Seppelt 1 and 2 pipes.

URANIUM INTERESTS

The company holds 25% of the issued capital in Top End Uranium in accordance with the terms of the Mineral Rights Agreement, whereby it assigned to Top End Uranium the non diamond mineral rights to its tenements. Top End Uranium Ltd is a uranium focused exploration company with uranium and base metals mineral rights over an a land package in the Northern Territory. Top End Uranium's tenement holding covers an area aggregating approximately 32,325 square kilometers across three project areas, Yambarra Project Area, Arnhem Land Project Area, and the McArthur South Project Area.

Yambarra Project: The Yambarra Project area comprises a contiguous land holding located within a major tectonic zone that links the Pine Creek Orogen to the Halls Creek Mobile Belt, which is host to mineral occurrences.

Arnhem Land Project: The Arnhem Land Project Area lies within a region that is host to significant and in some instances unconformity related uranium related mineralization. Top End has identified 23 target areas in the Arnhem Land Project for initial ground follow-up once access is available.

McArthur South Project: The McArthur South Tenements area includes group of 8 granted tenements situated in the southern McArthur Basin.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
