The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Northern Trust Corporation business.

About Northern Trust Corporation

Northern Trust Corporation, a financial holding company, provides asset servicing, fund administration, investment management, banking and fiduciary solutions for corporations, institutions, and affluent individuals worldwide. The company conducts business through various U.S. and non-U.S. subsidiaries, including The northern Trust Company (Bank). It operates 79 offices in 18 U.S. states and 16 international locations outside the U.S.

Business Units

The company organizes its services around its two business units: Corporate and Institutional Services (C&IS) and Personal Financial Services (PFS). Two other business units provide services to the two principal business units: northern Trust Global Investments (NTGI), which provides investment management, and Operations and Technology (O&T), which provides operating and systems support.

Corporate and Institutional Services

C&IS is a provider of asset servicing, asset management, and related services to corporate and public retirement funds, foundations, endowments, fund managers,

insurance companies, and government funds. C&IS also offers a range of commercial banking services, placing special emphasis on developing and supporting institutional relationships in two target markets: large and mid-sized corporations and financial institutions.

Asset servicing, asset management, and related services encompass a range of capabilities, including global master trust and custody, trade settlement, and reporting; fund administration; cash management; investment risk and performance analytical services; and investment operations outsourcing.

Asset servicing relationships managed by C&IS include investment management, securities lending, transition management, and commission recapture services provided through NTGI. C&IS also provides related foreign exchange services in the U.S., U.K., and Singapore.

Personal Financial Services

PFS provides personal trust, investment management, custody, and philanthropic services; financial consulting; guardianship and estate administration; brokerage services; and private and business banking. PFS focuses on high net worth individuals and families, business owners, executives, professionals, retirees, and privately-held businesses in its target markets. PFS also includes the Wealth Management Group, which provides customized products and services to meet the financial needs of individuals and family offices in the United States and throughout the world.

PFS is a provider of personal trust services in the United States. PFS services are delivered through a network of 79 offices in 18 the U.S. states, as well as offices in London and Guernsey.

Northern Trust Global Investments

NTGI, through various subsidiaries of the company, provides a range of investment management and related services and other products to the U.S. and non-U.S. clients, including clients of C&IS and PFS. Clients include institutional and individual separately managed accounts, bank common and collective funds, registered investment companies, non-U.S. collective investment funds and unregistered private investment funds. NTGI offers both active and passive equity and fixed income portfolio management, as well as alternative asset classes (such as private equity and hedge funds of funds) and multi-manager products and services. NTGI's activities also include

brokerage, securities lending, transition management, and related services. NTGI's business operates internationally through subsidiaries, joint ventures, alliances, and distribution arrangements.

Significant Events

In March 2010, Northern Trust Corporation has launched the Northern Trust Company Sub-Advised Collective Funds Trust, a new investment fund platform that would consist of a series of collective funds sub-advised by investment managers retained and overseen by the company.

Loan Portfolio

As of December 31, 2009, the company's loan portfolio included residential real estate loans, commercial loans, commercial real estate loans, personal loans, and lease financing.

Investment Portfolio

As of December 31, 2009, the company's investment portfolio included securities of U.S. Government, obligations of states and political subdivisions, government sponsored agency securities, and asset-backed securities.

Deposits

The company's primary deposit offerings include demand and non interest bearing, savings and money market, savings certificates, and time deposits.

History

Northern Trust Corporation was founded in 1889.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
