The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Northland Power Income Fund business.

About Northland Power Income Fund

Northland Power Income Fund operates as an income trust in Canada. The company owns interests in six power-generating facilities, including three natural-gas-fired power plants and three wind farms. Northland Power Income Fund Management Inc. serves as the manager of the company.

Facilities

The company's gas-fired plants produce electricity and steam. Two of these are wholly owned projects in Ontario: the Iroquois Falls cogeneration facility and the cogeneration plant in Kingston. Through its 19% equity ownership in Panda Energy Corp. (PEC) and loan to a PEC subsidiary, it has an interest in the Panda-Brandywine combined-cycle plant located outside Washington, D.C. The company owns the Mont Miller wind farm in the Gaspesie region of Quebec and two wind farms in Germany.

Iroquois Falls Facility: The company's 120-megawatt (MW) Iroquois Falls facility is developed by Northland Power Inc., a wholly owned subsidiary of the company. The facility is a combined-cycle cogeneration plant located approximately 650 kilometers north of Toronto. The Iroquois Falls facility generates electricity and sells it to Ontario Electricity Financial Corporation (OEFC). Steam produced at the plant is supplied to the

neighbouring AbitibiBowater Inc. pulp and paper mill.

Kingston Facility: The company's 110 MW Kingston Facility is a combined-cycle cogeneration plant located near Lake Ontario, approximately 220 kilometers east of Toronto. Kingston LP has a long-term power purchase agreement with OEFC for the sale and delivery of a specified annual quantity of electricity.

Mont Miller Wind Farm: The Mont Miller facility is a 54 MW wind farm located near the town of Murdochville, Quebec, in the Gaspesie region, approximately 80 kilometers west of Gaspé and 35 kilometers south of the St. Lawrence River. The farm's 30 turbines cover an area of approximately 25 square kilometers. The Mont Miller facility generates electricity from 30 Vestas V80 wind turbines, each with a capacity of 1.8 MW. The power produced by the Mont Miller facility is sold to Hydro-Quebec.

German Wind Farms: The company owns two operating wind farms in Germany with a total installed capacity of 21.5 MW. The 7.2 MW Kavelstorf wind farm comprises four Nordex N60 1.3 MW turbines and two Nordex N54 1.0 MW turbines. The Kavelstorf wind farm is located in northern Germany near Rostock. The 14.3 MW Eckolstadt wind farm includes 11 Bonus Energy A/S (a member of the Siemens AG group) turbines rated at 1.3 MW each. The Eckolstadt wind farm is located near Jena in central Germany. The electricity generated by the German wind farms is supplied to regional power utilities.

Panda-Brandywine Facility: The company owns 230 MW Panda-Brandywine facility, located outside Washington, D.C. The facility produces electricity and steam using natural gas as the primary fuel and no. 2 fuel oil as a backup fuel. The facility has two GE industrial gas turbines with heat-recovery steam generators and a steam turbine.

History

Northland Power Income Fund was founded in 1997.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
