Abstracts

Northwest Pipe Co. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Northwest Pipe Co. and its competitors. This provides our Clients with a clear understanding of Northwest Pipe Co. position in the [Engineering and Construction Services](#) Industry.

The report contains detailed information about Northwest Pipe Co. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Northwest Pipe Co.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Northwest Pipe Co. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Northwest Pipe Co. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Northwest Pipe Co. business.

About Northwest Pipe Co.

Northwest Pipe Company manufactures large-diameter, high-pressure steel pipeline systems for use in water infrastructure applications, primarily related to drinking water systems. The company's pipeline systems are also used for hydroelectric power systems, wastewater systems and other applications. It manufactures water infrastructure products through its Water Transmission Group. In addition to manufacturing water infrastructure products, it also manufactures other welded steel products through its Tubular Products Group.

Products

Water Transmission: Water transmission pipe is used for high-pressure applications, requiring pipe to withstand pressures approximately 150 pounds per square inch. Other uses include pipe for piling and hydroelectric projects, wastewater transmission, treatment plants and other applications. The company's primary manufacturing process has the capability to manufacture water transmission pipe in diameters ranging from 4.5 inches to 156 inches with wall thickness of 0.135 inches to 1.00 inches. It could coat and/or line these products with cement mortar, polyethylene tape, polyurethane, paints, epoxies, Pritec, and coal tar enamel according to its customers' specifications. The company maintains fabrication facilities that provide installation contractors with custom

fabricated sections, as well as straight pipe sections.

Tubular Products: The company's tubular products range in size from 1.5 inches to 16 inches in diameter with wall thickness from 0.035 inches to 0.375 inches. These products are sold to distributors or original equipment manufacturers (OEMs) and are used for various applications, including energy, construction, agriculture, and traffic signpost systems.

Sales and Marketing

Water Transmission: The primary customers for water transmission products are installation contractors for projects funded by public water agencies. Its plant locations in Oregon, Colorado, California, West Virginia, Texas, Utah, and Mexico to serve customers throughout the United States, as well as Canada, and Mexico.

Tubular Products: The company's tubular products are marketed through a network of direct sales force personnel, sales agents, and independent distributors in the United States, Canada and Mexico. Its tubular product facilities are located in Kansas, Texas, and Louisiana. Its tubular products are primarily sold to distributors, although the company also sells to OEMs.

Suppliers

The company purchases hot rolled and galvanized steel coil from both domestic and foreign steel mills. Domestic suppliers include ArcelorMittal, SSAB, New Process Steel, Nucor Corporation, Gallatin Steel Company, California Steel Industries, Steel Dynamics, Inc., SeverStal, U.S. Steel Corporation, and NLMK Indiana. Foreign suppliers include BlueScope Steel and Ternium.

Competition

Water Transmission: The company's primary competitor in the water transmission business in the western United States and southwestern Canada includes Ameron International, Inc. East of the Rocky Mountains, its primary competition includes: American Cast Iron Pipe Company; Mueller Water Products; American Spiral Weld Pipe Company; and Hanson Pipe & Precast.

Tubular Products: The company competes with Lindsay Corporation, Valmont Industries, Inc., Tex Tube, TMK Ipsco, Tenaris, U.S. Steel, Allied Tube and Conduit

Corp. and John Maneely Company, as well as foreign competitors.

History

Northwest Pipe Company was founded in 1966.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
