- In the part that describes Novo Energies Corp. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.
- Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Novo Energies Corp. business.

### **About Novo Energies Corp.**

Novo Energies Corporation, a development stage company, intends to own and operate recycling plants that would recycle scrap tires and plastics into energy and other commodities.

The company, to recycle tires and plastics into energy, utilizes a multi stage hybrid gasification system (MSHG), which undertakes the conversion of carbonaceous feedstock to a gaseous end-product with an upgraded heating value.

The company would transform scrap tires and plastics into synthesis gas (syngas), which then is used as a fuel for engines and turbines to produce electricity. The syngas may also be converted into transportation fuel or fuel additives using a standard catalyst-based process, such as Fischer-Tropsch.

The above Company Fundamental Report is a half-ready report and contents are subject to change. It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.
