Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of NVR Inc. business.

## **About NVR Inc.**

NVR, Inc. engages in the construction and sale of single-family detached homes, townhomes, and condominium buildings. The company also operates a mortgage banking and title services business. Its mortgage banking operations are operated primarily through a wholly owned subsidiary, NVR Mortgage Finance, Inc. (NVRM).

### Homebuilding

The company's homebuilding operations include the construction and sale of single-family detached homes, townhomes and condominium buildings under four trade names: Ryan Homes, NVHomes, Fox Ridge Homes, and Rymarc Homes. The Ryan Homes, Fox Ridge Homes, and Rymarc Homes products are marketed primarily to first-time homeowners and first-time move-up buyers.

The Ryan Homes product is sold in 25 metropolitan areas located in Maryland, Virginia, West Virginia, Pennsylvania, New York, North Carolina, South Carolina, Ohio, New Jersey, Delaware, Kentucky, Indiana, and Florida. The Fox Ridge Homes product is sold solely in the Nashville, Tennessee metropolitan area and the Rymarc Homes product is sold solely in the Columbia, South Carolina metropolitan area. The NVHomes product is marketed primarily to move-up and upscale buyers and is sold in the Washington, D.C., Baltimore, Maryland; Philadelphia, Pennsylvania and the Maryland

Eastern Shore metropolitan areas.

The company's homes combine traditional or colonial exterior designs with interior designs and amenities, including two to four bedrooms and range from approximately 1,000 to 7,300 square feet.

**Markets:** The company's homebuilding segments operate in the following geographic regions: Maryland, Virginia, West Virginia and Delaware in the Mid Atlantic region; New Jersey and eastern Pennsylvania in the North East region; Kentucky, New York, Ohio, western Pennsylvania and Indiana in the Mid East region; and North Carolina, South Carolina, Florida, and Tennessee in the South East region.

### Mortgage Banking

The company provides mortgage related services to homebuilding customers through mortgage banking operations. Mortgage banking operations also include separate subsidiaries that broker title insurance and perform title searches in connection with mortgage loan closings for which they receive commissions and fees. NVRM originates mortgage loans for homebuilding customers. In 2009, NVRM closed approximately 8,000 loans. NVRM sells all of the mortgage loans it closes to investors in the secondary markets on a servicing released basis, typically within 30 days from the loan closing. NVRM is an approved seller/servicer for FNMA, GNMA, FHLMC, VA and FHA mortgage loans.

### History

NVR, Inc. was founded in 1979.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
