The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Nyrstar NV business.

## **About Nyrstar NV**

Nyrstar NV produces and sells zinc metals and alloys in China, Australasia, Europe, India, the Middle East, and the Russian Federation

### Segments

The company's segments include Hobart Smelter, Port Pirie Smelter, Clarksville Refinery, Budel Smelter, Auby Smelter, Balen Smelter, Chinese Operations, and Other Operations.

**Hobart Smelter:** The Hobart smelter is a large-scale electrolytic zinc refinery located on the Derwent River in Tasmania's capital city, Hobart.

**Port Pirie Smelter:** The Port Pirie smelter is located on the eastern side of the Spencer Gulf in South Australia. Port Pirie is a primary lead smelting facility and a global silver producer. The majority of Port Pirie's lead output is exported, primarily to Asia.

**Clarksville Refinery:** The Clarksville refinery is located on the Cumberland River close to Clarksville, Tennessee in the United States of America. Clarksville is a mid-scale electrolytic zinc refinery producing zinc and zinc alloys and supplying customers in the United States mid-west.

**Budel Smelter:** The Budel smelter is located at Budel Dorplein in the Netherlands, close to the Belgian border. It is a large-scale electrolytic zinc refinery producing zinc and zinc alloys for the European market.

**Auby Smelter:** The Auby smelter is located in the town of Auby in the north of France. Auby is a mid-sized plant and using electrolytic smelting to produce zinc cathodes.

**Balen Smelter:** The Balen smelter is a large-sized electrolytic zinc smelter that also incorporates the die-casting and alloying operations in Overpelt and a sales office in Germany.

**Chinese Operations:** Nyrstar's Chinese Operations include Nyrstar Yunnan, Föhl China and Genesis Alloys. These entities are involved in the production of SHG zinc, die-casting parts, and die-casting alloys respectively. Nyrstar has a 60% interest in Nyrstar Yunnan and 50% interests in both Föhl China and Genesis.

**Other Operations:** Other Operations combines operations based in Australia, Australia Refined Alloys (ARA) and France (Galva 45 and GM-Metal).

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
