Abstracts

Omoplata, Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Omoplata, Inc. and its competitors. This provides our Clients with a clear understanding of Omoplata, Inc. position in the [Food and Beverages](#) Industry.

The report contains detailed information about Omoplata, Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Omoplata, Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Omoplata, Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Omoplata, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Omoplata, Inc. business.

About Omoplata, Inc.

Cattleman's, Inc. (Cattleman's) is the successor of Arrow Point Resources, Inc. (Arrow Point), a Utah non-operating shell corporation incorporated in 1984. Cattleman's Meat was originally organized as Eastern Market Beef Processing Corp. (Eastern Market). The company, a Delaware corporation, through its wholly-owned subsidiary, Cattleman's Meat Company (Cattleman's Meat), a Michigan corporation, conducts wholesale beef processing and fresh food outlet sales operations. Beef processing involves the conversion of carcasses of fresh beef into boxed beef, which is marketed primarily in the United States to hotel, restaurant and institutional distributors, retail distributors and other beef fabrication processors. Five retail outlets sell fresh wholesale cuts of beef, retail cuts of beef, pork, poultry and fresh produce to the general public under the name "Cattleman's Farmers' Markets".

PROCESSING

Cattleman's converts beef carcasses into "boxed beef" (packing house style wholesale cuts of beef) and trimmings (used primarily for hamburger and beef sausage) at its Scott Street plant. Cattleman's does not raise cattle and it does not reduce live cattle to dressed carcasses. Cattleman's purchases the carcass beef by the "swinging trailer load" (e.g., in quarters on hooks) primarily from what it believes are the three largest

slaughtering companies in the country: (i) Iowa Beef Processors; (ii) Monfort, Inc., a subsidiary of ConAgra, Inc.; and (iii) Excel, a subsidiary of Cargill, Inc.

PRODUCTS

Cattleman's product line includes a variety of grades and sizes of beef. The beef carcasses received from the suppliers have generally already been graded by the suppliers. The suppliers generally have exact specifications that all their carcass beef must satisfy for automated processing in their plants. These specifications include size, shape, fat cover and color. Cattleman's is an outlet for these suppliers of carcass beef which does not satisfy their exact specifications.

Outlet customers shop in a "no frills" temperature controlled environment, where both packing house style and retail cuts of fresh meat along with deli lunch meat and dairy products are displayed. The outlets, which are generally open seven days a week, sell wholesale cuts of beef, retail cuts of beef, pork, poultry, produce, deli and dairy.

CUSTOMERS

The customers of the beef fabricating wholesale operation are primarily hotel, restaurant and institutional distributors, retail distributors and other processors.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
