Abstracts

Omron Corp. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Omron Corp. and its competitors. This provides our Clients with a clear understanding of Omron Corp. position in the [Computers and Electronic Equipment](#) Industry.

The report contains detailed information about Omron Corp. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Omron Corp.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Omron Corp. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your

company's decision-making processes.

In the part that describes Omron Corp. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Omron Corp. business.

About Omron Corp.

OMRON Corporation manufactures automation components, equipment and systems with computer, communications and control technologies worldwide. The company conducts business in approximately 30 countries worldwide and strategically manages its worldwide operations through 5 regional management centers in Japan, North America, Europe, the Asia-Pacific and China.

Segments

The company conducts its operations through five business segments: Industrial Automation Business, Electronic Components Business, Automotive Electronic Components Business, Social Systems Business, and Healthcare Business.

Industrial Automation Business (IAB)

Industrial Automation Business provides a range of equipment ranging from factory automation (FA) controllers to sensors, switches, relays, and safety equipment that meet approximately 100,000 specifications and support monozukuri (the art of producing things) innovation and productivity improvement in all types of production operations in 80 countries.

The company's products include real color visual sensors; real color 3d visual sensors; digital timers and electronic counters; temperature controllers; safety light curtains; network automated optical inspection devices; portable multidata loggers; temperature control modules; multiple input units; and safety laser scanners.

Electronics Components Business (ECB)

The company offers an integrated manufacturing system for electronic components for consumer appliances, telecommunications equipment, mobile devices, amusement devices, office automation (OA) and other equipment incorporating the company's proprietary semiconductors and a range of components, including all types of relays, switches, connectors, sensors, and optical fiber communications. The company develops cutting-edge devices using MEMS technology.

The company's products include MEMS microphones, RF MEMS switches, combination jogs, touch sensors, FPC connectors, surface mount switches, LCD backlights, optical splitter modules, ultra wideband antennas, and surface mount high-frequency receivers.

Automotive Electronic Components Business

The company conducts contracted design and development of all types of controllers, sensors, switches, relays, and new systems for automakers and electronics producers worldwide. The company provides the sensing and control technology for the future of auto manufacturing.

The company's products include laser radars, electric power steering controllers, automotive relays, smart entry systems, and power window switches.

Social Systems Business (SSB)

The company provides various systems to support social infrastructure centering on railway and traffic control systems. SSB has been a major contributor of IC card equipment for railway infrastructure systems building on its position as a domestic supplier of automated ticket gates and ticket machines. The company's products include automated ticket gates and road traffic control systems.

Healthcare Business

The company provides equipment and services worldwide for home healthcare

monitoring and medical institutions to support the prevention, treatment, and health improvement fields. The company's products include non-invasive vascular screening devices, electric toothbrushes, self blood glucose checker, digital blood pressure monitors, pedometers, and body composition monitors.

Business Development Group and Other Businesses

The company's other products include UHF-band RFID reader/writers, UHF-band RFID inlays, remote energy monitoring systems, and uninterruptible power supply units.

Significant Events

On October 12, 2009, Oracle Corp. and Omron Corp. are collaborating to create a new solution designed to track energy consumption and carbon dioxide emissions in manufacturing and non-manufacturing facilities.

History

OMRON Corporation was founded in 1933.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
