Abstracts

Oncothyreon Inc Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Oncothyreon Inc and its competitors. This provides our Clients with a clear understanding of Oncothyreon Inc position in the [Pharmaceuticals and Biotechnology](#) Industry.

The report contains detailed information about Oncothyreon Inc that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Oncothyreon Inc. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Oncothyreon Inc financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Oncothyreon Inc competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Oncothyreon Inc business.

About Oncothyreon Inc

Oncothyreon Inc., a clinical-stage biopharmaceutical company, focuses primarily on the development of therapeutic products for the treatment of cancer. The company's cancer vaccines are designed to stimulate the immune system to attack cancer cells, while small molecule compounds are designed to inhibit the activity of specific cancer-related proteins.

Stimuvax

The company's main product candidate under clinical development is a vaccine called as Stimuvax. Stimuvax incorporates a 25 amino acid sequence of the cancer antigen MUC1, in a liposomal formulation. Stimuvax is designed to induce an immune response to destroy cancer cells that express MUC1, a protein antigen widely expressed on common cancers, such as lung cancer, breast cancer, and colorectal cancer.

ONT-10 Liposome Vaccine Product Candidate

The company has developed a completely synthetic MUC1-based liposomal glycolipopeptide cancer vaccine, ONT-10, for potential use in several cancer indications, including breast, thyroid, colon, stomach, pancreas and prostate, as well as

certain types of lung cancer. The ONT-10 glycolipopeptide combines carbohydrate and peptide determinates in a multi-epitopic vaccine that evokes both cellular and humoral immune responses against major cancer-associated epitopes expressed on adenocarcinomas.

Small Molecule Drugsx

The company is in the process of developing PX-866 and PX-478, which the company obtained as a part of the ProIX acquisition.

PX-866

PX-866 is an inhibitor of the phosphatidylinositol-3-kinase (PI-3-kinase)/PTEN/Akt pathway, an important survival signaling pathway that is activated in various types of human cancer.

PX-478

PX-478 is a small molecule inhibitor of hypoxia inducible factor-1a (HIF-1a), a component of a transcription factor which is an important regulator of the tumor response to hypoxia.

License Agreements

The company has in-licensed targets and intellectual property from academic institutions for use in its pipeline programs, including the following:

Cancer Research Technology Limited: In 1991, the company acquired from Cancer Research Technology Limited (CRTL) of London, England a world-wide license of CRTL's rights to the Mucin 1 peptide antigen, or MUC1, found on human breast, ovarian, colon and pancreatic cancer and other types of solid tumor cells for uses in the treatment and diagnosis of cancer and other diseases.

University of Alberta: In 2001, the company entered into a license with the University of Alberta for certain patents relating to natural lipid-A, an adjuvant for vaccine formulations which the company uses in Stimuvax.

University of Arizona: In connection with its acquisition of ProIX, the company assumed ProIX's existing license agreements with the University of Arizona and Georgetown

University. Pursuant to these agreements, certain intellectual property related to PX-12, PX-478, PX-866 and PX-316 were exclusively licensed to ProIX.

Significant Events

In June 2010, ImmunoVaccine Inc. announced the signing of a research agreement with Oncothyreon Inc. to develop a potential therapeutic cancer vaccine. Under the agreement, Oncothyreon's ONT-10, a therapeutic vaccine product candidate, would be formulated in Immunovaccine's DepoVax delivery platform for preclinical testing. Oncothyreon's ONT-10 is a synthetic MUC1-based liposomal glycolipopeptide cancer vaccine. Immunovaccine's DepoVax platform is a lipid in oil-depot vaccine delivery and enhancement technology.

History

Oncothyreon Inc. was founded in 1985.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
