company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes One Voice Technologies Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of One Voice Technologies Inc. business.

About One Voice Technologies Inc.

One Voice Technologies, Inc., a voice recognition technology company, develops and sells voice recognition software for the telecom and interactive multimedia markets in the United States. The company's telecom solutions allow business and consumer phone users to voice dial, group conference call, read and send e-mail, and instant message, all by voice.

Offerings

Network and Enterprise – Messaging

Email Access: The company's email access allows users take control of their email account from any phone worldwide. Supports all email providers, including: Yahoo Mail, Hotmail, Gmail, AOL Mail, POP3, and IMAP.

Voice-to-SMS: The company's Voice-to-SMS solution allows wireless and wireline operators along with enterprises to offer true mobility for outbound generated text messaging services.

Voicemail-to-SMS: The company's Voicemail-to-SMS solution allows wireless and

wireline operators along with enterprises to offer immediate message delivery of inbound voicemail audio messages converted to text and sent as an SMS to the phone.

Network and Enterprise - Voice Communications

Voice Dialing: The company's Voice Dialing solution allows wireless and wireline operators along with enterprises to offer hands-free voice dialing of any contacts in the personal address book. It syncs with Outlook and Lotus Notes allowing for contacts to be setup in minutes.

Group Calling: The company's Group Calling solution allows wireless and wireline operators along with enterprises to offer spontaneous group calling for up to 64 participants in a preset group.

Spontaneous Audio Conferencing: The company's Group Calling solution allows wireless and wireline operators along with enterprises to offer spontaneous group calling for up to 64 participants. Features include: customizable message greeting; moderator touch-tone control; moderator dial-out during conference; up to 64 participants; available anytime.

Network and Enterprise - Directory Assistance

The company's directory assistance is the 411-business and residential lookup along with corporate enterprise names directory lookup. Its 411 solutions allow for name searches.

Digital Home - Media Center Communicator:

Voice-Activated Music: Works with iTunes and Windows Media Player.

Voice-Activated Photos: Command the photos to come alive by saying the album name.

Voice-Activated TV and Movies: Instantly access the recorded shows and movie collection using voice.

Voice-Activated Skype: Works with Skype to place calls anywhere in the world.

Voice-Activated Email: Works with various email providers.

Media Center Communicator (MCC) is software, designed specifically for Windows Vista Media Center that allows users to speak to access the content they desire using voice recognition. MCC requires no voice training and no programming so it is ready to use right out of the box.

Digital Home - VoiceTunes

VoiceTunes works directly with the existing iTunes and Windows music libraries. Just speak commands like 'Play Artist The Rolling Stones' or 'Play Rock Music' to enjoy the music without clicking through menus and folders.

VoiceTunes installs and works right out of the box with no voice training required.

Mobility - Intel Based Mobile Internet Device (MID)

The company has developed voice activated solutions for the new sector of Mobile Internet Device (MIDs) allowing consumers to play music, view photos, videos, and Internet searching through voice control.

Mobility - MobileVoice for StreetDeck:

The company has developed voice solution add-on for StreetDeck. StreetDeck is a navigation and infotainment solution for mobile PC's and Ultra Mobile PC's (UMPC's).

Customers

The company's customers include: Telefonos de Mexico, S.A.B. de C.V. (TELMEX), Intel Corporation, the Government of India, Fry's Electronics, Inland Cellular, Nex-Tec Wireless, and various additional telecom service providers throughout the United States.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
