The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of OneSteel Ltd. business.

About OneSteel Ltd.

OneSteel Limited engages in the mining and supply of steelmaking raw materials to steel mills in Australia and internationally. The company recycles ferrous and non-ferrous scrap metal; and manufactures and distributes steel long products. It manufactures and distributes a range of products, including structural, rail, rod, bar, wire and pipe and tube products. In addition, it distributes sheet and coil, piping systems, plate, and aluminum products.

Segments

The company's segments include Recycling, Iron Ore, Manufacturing, Australian Distribution, and New Zealand Distribution.

Recycling

The Recycling segment operates in 13 countries through a combination of physical operations and trading offices, supplying steel making raw materials to steel mills operated in Australia and worldwide.

Iron Ore

The Iron Ore segment supplies iron ore to OneSteel's integrated steelworks at Whyalla sourced from OneSteel's mines located in the Middleback Ranges, approximately 60 kilo meters from Whyalla, South Australia.

Manufacturing

Manufacturing segment combines the activities of steel production and the product mills. The Whyalla Steelworks produces billet as feedstock for OneSteel's Market Mills operations together with rail products, structural steels, and slabs for external sale.

Within Market Mills, the Sydney and Laverton steel mills produce steel billets for the manufacture of reinforcing and bar products on its own rolling mills, as well as steel billet to be used as feed in the company's other rolling facilities. Waratah Steel Mill produces billet and ingot for the manufacture of specialty steel products, including rail wagon wheels and grinding media used in the mining, quarrying and cement industries. Rod, Bar, and Wire manufacture products, which are used in a range of applications, such as manufacturing, construction, mining, and automotive industries.

Australian Distribution

Australian Distribution business provides a range of steel and metal products to resellers and end-users, including structural steel, steel plate, angles, channels, flat sheet, reinforcing steel, sheet steel and coil and a range of aluminum products, pipes, fittings and valves. The reinforcing business and pipe and tube business within Australian Distribution manufactures and distributes product throughout Australia for the construction, mining, oil and gas, and manufacturing industries.

New Zealand Distribution

The company owns 50.3% of Steel & Tube Holdings Limited, a steel distribution company. It processes and distributes a range of steel and allied products in the construction, manufacturing and rural industries to the New Zealand market.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same

price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
