Abstracts

OneWorld Systems, Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between OneWorld Systems, Inc. and its competitors. This provides our Clients with a clear understanding of OneWorld Systems, Inc. position in the Industry.

The report contains detailed information about OneWorld Systems, Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for OneWorld Systems, Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The OneWorld Systems, Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes OneWorld Systems, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of OneWorld Systems, Inc. business.

About OneWorld Systems, Inc.

OneWorld Systems, Inc (the Company) was founded in 1989 and incorporated in Delaware as Global Village Communication, Inc. The Company develops and manufactures products that enhance and simplify wide-area data communications for the small and medium sized office market. The Company's OneWorld Network Communications Servers are designed to be versatile, easy-to-use, cost-effective and expandable solutions that combine Internet access and routing, remote access, on-line service access and fax capabilities.

Until June 18, 1998, the company actively engaged in the single-user modem business. The Company's products enabled mobile, home office and networked computer users in small and medium sized organizations to communicate efficiently via the Internet with colleagues, customers and suppliers. During this period, the company continued to develop and market single-user modem products which included the company's Teleport modems for Windows and Macintosh desktop computers, PC Card modems for Windows notebook computers, PC Card and PowerPort modems for Macintosh PowerBook notebook computers, products sold to Apple Computers on an OEM basis and OEM versions of Faxworks single user fax software.

The Company is now wholly focused on its new family of communications servers

targeted to the small and medium sized office market. These server products combine Internet access and routing, remote access, fax and shared modem capabilities in a single, easy-to-use product.

Technology and Products

Oneworld Network Communications Servers

In September 1998, the company began shipping the OneWorld Network Communications Server family which integrates hardware, server software and client software elements into a complete solution. Its servers are designed to provide versatile, easy-to-use, cost effective and expandable solutions that will meet the growing communication needs of small and medium sized businesses:

Versatility: The Company's family of network communications servers are designed to provide the major wide-area data communications functions required by small and medium sized offices or businesses, including Internet access and routing, sending and receiving faxes, remote access and modem pooling. These capabilities solve a number of business problems for its customers.

OneWorld Network Communications Servers give all employees on the network access to the Internet by sharing fewer phone lines via the OneWorld server. Each employee, at his/her own computer, may dial out via the company's server to access their Internet service provider. By sharing phone lines, a small business can better utilize its communications equipment while providing shared Internet access to its employees.

The OneWorld server simplifies these tasks by letting employees fax a document directly from their computer, without the hassle of printing and standing at a fax machine. When the same document needs to be sent to multiple people, a simple click of a mouse button takes care of the process without any user intervention. In addition, the company's server solutions include FaxWorks for Windows and GlobalFax for Macintosh fax software with every OneWorld Fax Server and Suite Server product. Designed to be easy to use, the company's fax software includes everything an employee needs to create fax cover sheets, send single and multiple faxes and track the progress of each fax as it occurs.

The OneWorld server lets faxes be routed directly to a user's computer just like email. When a fax is received, it shows up in the Fax Inbox for immediate viewing by the recipient. In addition, a fax can be routed to others, can be marked up with notes and

highlights for others to see, and can be filed for future reference. With the OneWorld server, faxes won't be lost and will be sent to the right person directly, and in confidence.

By dialing into the OneWorld server from a remote computer, employees can easily gain access to the company network. Once the OneWorld server verifies the user's identity and privileges, the employee can obtain files, address books, and other information as though they were actually in the office sitting at their desks. I

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
