Abstracts

Optical Cable Corp. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Optical Cable Corp. and its competitors. This provides our Clients with a clear understanding of Optical Cable Corp. position in the [Computers and Electronic Equipment](#) Industry.

The report contains detailed information about Optical Cable Corp. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Optical Cable Corp.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Optical Cable Corp. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Optical Cable Corp. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Optical Cable Corp. business.

About Optical Cable Corp.

Optical Cable Corporation manufactures fiber optic and copper data communication cabling and connectivity solutions, primarily for the enterprise market, offering an integrated suite of warranted products. The company's product offerings include designs for uses ranging from commercial, enterprise network, datacenter, residential and campus installations to customized products for specialty applications, and harsh environments, including military, industrial, mining, and broadcast applications.

The company's products include fiber optic and copper cabling, fiber optic and copper connectors, specialty fiber optic and copper connectors, fiber optic and copper patch cords, racks, cabinets, datacom enclosures, patch panels, face plates, multi-media boxes, and other cable and connectivity management accessories. Its fiber optic and copper cabling and connectivity products and solutions are used for transmission of data, video and voice communications over various distances.

Fiber Optic Cable Products

The company designs, manufactures, markets and sells a range of fiber optic cables that provide high bandwidth transmission of data, video and voice communications over short- to moderate-distances.

A-Series Assembly Fiber Optic Cables: The company's A-Series fiber optic cables contain one or two optical fibers which are surrounded by a layer of aramid yarn strength members to prevent the optical fiber from being stretched if there is tension on the fiber optic cable. These fiber optic cables are used for jumpers, which are short length patch cords, and for pigtails, which are short lengths of fiber optic cable with a connector on one end. Various special outer jacket materials are offered to provide flammability ratings and handling characteristics tailored to customers' needs. These fiber optic cables are sometimes privately labeled and often sold to original equipment manufacturers that produce the fiber optic cable assemblies.

B-Series Breakout Fiber Optic Cables: The company's B-Series fiber optic cables consist of a number of subcables, each consisting of a single optical fiber, aramid yarn strength members and a subcable jacket. These subcables are generally tightbound in a performance Core-Locked outer jacket to form the finished multifiber fiber optic cables. The materials and construction of the fiber optic cable permit its use both indoors and outdoors.

D-Series Distribution Fiber Optic Cables: The company's D-Series fiber optic cables are made with the same tight-buffered optical fiber as the B-Series fiber optic cables and with a performance outer jacket. Its D-Series fiber optic cables also are available with a Core-Locked jacket. D-Series fiber optic cables are used in longer length segments of installations, such as trunking, LAN and distribution applications, optical fiber in the loop, optical fiber to the curb and drop cables.

G-Series Subgrouping Fiber Optic Cables: The company's G-Series fiber optic cables combine various multifiber subcables, each similar to a D-Series fiber optic cable. Each multifiber subcable generally is tightbound with an elastomeric jacket, providing mechanical and environmental performance. These subcables are further protected, generally with a pressure extruded, performance Core-Locked outer jacket, to form the finished fiber optic cable. These fiber optic cables are suited for installations where groups of optical fibers must be routed to different locations.

Other Fiber Optic Cable Types: The company produces variations on the basic fiber optic cable styles for specialized installations, as well as various hybrid and composite cables. It could armor fiber optic cables with corrugated steel tape or interlocking armor for further protection in certain installations. It offers cables suitable for underground or overhead installations. For overhead installations on utility poles, it offers self-supporting fiber optic cables, with outer jackets, as well as M-Series aerial messenger cables,

which include stainless steel or galvanized steel, self-supporting messengered construction.

The company has fiber optic cables available in various flammability ratings, inc

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
