term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Oremex Resources Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Oremex Resources Inc. business.

About Oremex Resources Inc.

Oremex Resources Inc., a development stage company, engages in the acquisition, exploration, and development of mineral properties located in Durango, Mexico. The company holds six mineral concessions through its wholly owned subsidiaries Oremexico S.A. de C.V and Minera Montana R.L. de C.V.

Tejamén Property, State of Durango

Tejamén is the company's major project. The property consists of 22 mineral concessions covering approximately 1,672 hectares.

San Lucas Property, State of Durango

The San Lucas Property (San Lucas) located 86 kilometres north of the city of Durango. It consists of 18 mineral concessions covering 925 hectares. San Lucas consists of a series of northeast trending mineralized shear zones in volcanic and sedimentary rocks.

Cuyoaco Property, State of Puebla

The company has agreement to acquire the Cuyoaco Property (Cuyoaco), a gold and

base metal project, in the State of Puebla, Mexico. The agreement provides the company, through its wholly-owned subsidiary Oremexico S.A. de C.V., with the option to purchase a 100 percent interest in the property.

Chalchihuites Property, State of Zacatecas

The Chalchihuites Property is located 100 kilometres southeast of the city of Durango. It consists of 4 mineral concessions totaling 48 hectares.

Maco Property, State of Sinaloa

The Maco Property is located near San Blas, Sinaloa. It consists of a single concession covering 1,500 hectares.

Santa Catarina Property, State of Sinaloa

The Santa Catarina consists of two mineral concessions hosting a gold-bearing massive sulphide gold system. The 142 hectare property is located near the village of Santa Catarina in the State of Sinaloa. An additional 100 hectare mineral concession was acquired by staking.

History

Oremex Resources Inc. was founded in 1995.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
