Such information creates your awareness about principal trends of Origo Partners plc business.

## **About Origo Partners plc**

Origo Partners plc is a private equity and venture capital firm specializing in early venture, mid venture, late venture, growth-stage and green-field investments, and resource acquisitions. It invests in pre-IPO opportunities; expansion stage; and special situations and co-investments; and PIPE's and spin-offs of public companies. The firm makes investments in the natural resource sector with a focus on metals and minerals, mobile applications and content, art and paper products, forestry and agriculture, food and beverage, online gaming, anti-virus software, forest products such as paper and pulp, bio-energy feed-stocks, water, fossil based fuels (such as oil, coal, and gas) for reserve and concession rights; alternative energies (such as bio-energy, wind, hydro, thermo and solar power) for distribution/operations; the value-chain or value-added processing and manufacturing encompassing resource acquisitions, extraction, refinement and beneficiation; value-added manufacturing; build, own, operate and transfer models; and technologies, solutions and services related thereto. It targets investments in companies based in India, Mongolia, China, Africa, South-American, and South East Asia. The firm typically, invests between \$5 million and \$20 million in companies having revenues between \$10 million and \$300 million. It seeks to acquire substantial minority interests, holding between 10 and 40 per cent of the portfolio company. However, the firm may also consider smaller or larger, stakes. It generally, holds investments for 24 months on an average. However, the firm holds its growth

investments for a period between 18 months and 24 months; pre-IPO opportunities for a period between 6 months and 18 months; expansion stage for a period between 18 months and 36 months; special situations and co-investment for a period between 24 months and 48 months; and green-field investments and resource acquisitions between 24 months and 48 months. It seeks to exit through IPOs, trade sales to other strategic or institutional investors, redemptions, buy-backs, and or management buy-outs and aims to achieve an IRR of at least 25 per cent in its portfolio company. The firm makes investment not exceeding 20 per cent. of the Net Asset Value of the portfolio company at the time of investment. However, it may consider investments which represent a larger proportion of the Net Asset Value of the Company. Origo Partners plc is based in Guernsey, Channel Islands, with an additional office in Beijing, China and Ulan Bator, Mongolia.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
