Abstracts

Orion Marine Group, Inc Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Orion Marine Group, Inc and its competitors. This provides our Clients with a clear understanding of Orion Marine Group, Inc position in the [Engineering and Construction Services](#) Industry.

The report contains detailed information about Orion Marine Group, Inc that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Orion Marine Group, Inc. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Orion Marine Group, Inc financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Orion Marine Group, Inc competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Orion Marine Group, Inc business.

About Orion Marine Group, Inc

Orion Marine Group, Inc. is a marine specialty contractor serving the heavy civil marine infrastructure market. The company provides a range of marine construction services on, over and under the water along the Gulf Coast, the Atlantic Seaboard, and in the Caribbean Basin.

Services

The company provides a range of heavy civil marine construction services. In addition, it provides dredging, repair and maintenance, and other specialty services.

Marine Construction Services

These services include construction of marine transportation facilities, marine pipelines, bridges and causeways, and marine environmental structures.

Marine transportation facility construction projects include public port facilities for container ship loading and unloading; cruise ship port facilities; private terminals; special-use Navy terminals, recreational use marinas and docks, and other marine-based facilities. These projects consist of steel or concrete fabrication dock or mooring

structures designed for durability and longevity, and involve driving piles of concrete, pipe or sheet pile up to 90 feet below the surface to provide a foundation for the port facility that the company subsequently constructs on the piles. The company also provides on-going maintenance and repair, inspection services, emergency repair, and demolition and salvage to such facilities.

The company's marine pipeline service projects include the installation and removal of underwater buried pipeline transmission lines; installation of pipeline intakes and outfalls for industrial facilities; construction of pipeline outfalls for wastewater and industrial discharges; river crossing and directional drilling; creation of hot taps and tie-ins; and inspection, maintenance and repair services.

The company's bridge and causeway projects include the construction, repair and maintenance of all types of bridges and causeways, as well as the development of fendering systems in marine environments, and it serves as the prime contractor for these projects, some of which may be design-build contracts. These projects involve fabricating steel or concrete structures designed for durability, and involve driving piles of concrete, pipe or sheet pile to create support for the concrete deck roadways that the company subsequently constructs on the piles. These piles can exceed 50 inches in diameter, can range up to 170 feet in overall length, and are often driven 90 feet into the sea floor. The company also provides ongoing maintenance and repair, as well as emergency repair, to bridges, pile supports, and fendering systems for bridges.

Dredging services

Dredging is integral to capital and maintenance projects, including maintenance for previously deepened waterways and harbors to remove silt, sand and other accumulated sediments; construction of breakwaters, jetties, canals and other marine structures; deepening ship channels and wharves to accommodate larger and deeper draft ships; containing erosion of wetlands and coastal marshes; land reclamation; and beach nourishment and creation of wildlife refuges. The company maintains multiple specialty dredges of various sizes and specifications to meet customer needs.

Specialty Services

The company's specialty services include salvage, demolition, surveying, towing, diving and underwater inspection, excavation and repair. Its diving services are performed in shallow water with little to no visibility and include inspections, salvage and pile restoration and encapsulation. Survey services include surveying pipelines and

performing hydrographic surveys which determine the configuration of the floors of bodies of water and detect and identify wrecks and obstructions.

Equipment

The company operates and maintains a diverse equipment fleet that includes the following: barges, dayboats, tugs, dredges, and cranes.

Customers

The company's customers include federal, state and local governmental agencies in the United States, as well as private commercial and industrial enterprises in the U.S. and the Caribbean Basin. Its major customer in 2009 included the US Army Corps of Engineers.

Significant Events

In January 2010, Seagull Services, LLC, a wholly-owned subsidiary of the company purchased the membership interests of T.W. LaQuay Dredging, LLC (TWLD), a Texas limited liability company, from LaQuay Holdings, Inc.; all of the issued and outstanding capital stock of Industrial Channel and Dock, Company and Commercial Channel and Dock Company; and certain parcels of real property located in Calhoun County, Port Lavaca, Texas.

History

Orion Marine Group, Inc. was founded in 1994.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
