Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Oxigene Inc. business.

About Oxigene Inc.

OXIGENE, Inc., a clinical-stage biopharmaceutical company, develops therapeutics to treat cancer and eye diseases. The company's primary focus is the development and commercialization of product candidates referred to as vascular disrupting agents (VDAs) that selectively disable and destroy abnormal blood vessels that provide solid tumors a means of growth and survival and also are associated with visual impairment in ophthalmological diseases and conditions.

ZYBRESTAT for Oncology

FALCON (fosbretabulin in advanced lung oncology) trial — randomized, controlled Phase II study with ZYBRESTAT in non-small cell lung cancer:

The company's therapeutic product candidate, ZYBRESTAT, is being evaluated in a Phase II/III pivotal registration study, as a potential treatment for anaplastic thyroid cancer (ATC), an aggressive and lethal malignancy. The U.S. Food and Drug Administration (FDA) also has granted Fast Track designation to ZYBRESTAT for the treatment of regionally advanced and/or metastatic ATC.

In addition, ZYBRESTAT is being evaluated in Phase II clinical trials as a treatment for: non-small cell lung cancer (NSCLC) in combination with the chemotherapeutic agents,

carboplatin and paclitaxel, and the anti-angiogenic agent, bevacizumab; and platinum-resistant ovarian cancer in combination with carboplatin and paclitaxel.

The company's ovarian cancer product ZYBRESTAT is being evaluated in Phase II trial as treatment for ovarian cancer in combination with the chemotherapeutic agents, carboplatin, and paclitaxel, in recurrent, platinum-resistant ovarian cancer presented at ASCO (American Society of Clinical Oncology).

OXi4503, a second generation VDA (vascular disrupting agents) for oncology indications

The company develops OXi4503, a second-generation, dual-mechanism VDA, as a treatment for certain solid tumor types. These tumor types include hepatocellular carcinoma, melanoma, and myeloid leukemia. The company has completed a Phase I clinical trial in patients with advanced solid tumors sponsored by Clinical Research United Kingdom; and is in the process of evaluating OXi4503 in an ongoing clinical trial in an OXiGENE-sponsored Phase Ib trial in patients with advanced solid tumors with hepatic involvement.

ZYBRESTAT for Ophthalmology

OXiGENE is in the process of undertaking an ophthalmology research and development program with ZYBRESTAT to develop a topical formulation of ZYBRESTAT for ophthalmological diseases and conditions that are characterized by abnormal blood vessel growth within the eye that results in loss of vision. In 2009, OXiGENE initiated Phase II proof-of-mechanism trial with intravenously-administered ZYBRESTAT in patients with polypoidal choroidal vasculopathy (PCV), a form of choroidal neovascularization.

Significant Events

Merger Agreement with VaxGen, Inc: In February, 2010, the company entered into a merger agreement with VaxGen, Inc.

History

OXiGENE, Inc. was founded in 1988.

The above Company Fundamental Report is a half-ready report and contents are

subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
