The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of OXIS International Inc. business.

About OXIS International Inc.

Oxis International, Inc. engages in the research, development, and sale of products that counteract the harmful effects of oxidative stress.

The company focuses on the research, development, and sale of products and/or proprietary formulations that can be classified into four main business sectors: dietary supplements, functional foods and functional beverages; personal care products, including skin care and cosmetics products; veterinary products for companion animals, livestock and performance animals, such as race horses; and proprietary compounds that may be out-licensed to biotechnology and/or pharmaceutical companies.

Products

The company's product candidates include therapeutic nutraceutical products, cosmeceutical products, and proprietary formulations that may out-licensed to biotech and pharmaceutical companies as drug candidates. The primary products that the company is initially focusing on incorporate the naturally occurring compound, L-Ergothioneine (ERGO), as a key component. ERGO is water soluble, amino acid antioxidant by microbes in the soil and commonly found in various species of

mushrooms and grapes, meats, and dairy products.

The company produces and sells a product named Ergo-Plex, which is a dietary supplement that may be prepared in various ingestible forms that provides ERGO and other accepted and clinically proven ingredients for the maintenance of joint health.

The company has sold small amounts of ERGO as a component to selected commercial customers in the cosmetics industry, especially in skin care products. It has also provided ERGO to a customer for use in veterinary fertility.

The company is in the process of developing a broader line of dietary supplements containing ERGO, and intends to develop, by itself or through alliances, functional food and beverages, and cosmeceutical products.

Competition

The company's competitors in the dietary supplement field include NBTY, Pharmavite, Amway Nutrilite, and Herbalife. In functional foods and beverages field the competitors include Monavie, Hain-Celestial, Pom, Wonderful, Hanson, Red Bull, and Silk. Its competitors in the cosmeceutical space include L'Oreal, Estee Lauder, NuSkin, and Mary Kay.

Significant Events

In August 2010, OXIS International Inc. announced the launch of its wholly owned subsidiary, Oxis Consumer Products, focused on the development, marketing, promotion, and sales of direct to consumer brands.

History

Oxis International, Inc. was founded in 1965.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
