The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Oxus Gold plc competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Oxus Gold plc business.

## **About Oxus Gold plc**

Oxus Gold plc, together with its subsidiaries is a mineral exploration and development group that is focused on precious and base metal opportunities in Central Asia. Oxus group (Oxus), which was established in 1996. Oxus is developing the Amantaytau gold mine in Uzbekistan. The company has also started a feasibility study for the Amantaytau sulphide mining project which has a current resource of 7.15 Mt at an average grade of 11.7g/t. Oxus is completing a final feasibility study on the Jerooy deposit which is expected to produce 180,000 oz/pa gold at a cash cost of US\$133/oz, commencing by mid 2005. In addition Oxus holds the Khandiza polymetallic project in Uzbekistan with a reported resource of 6.9 Mt at a 26% zinc equivalent grade. Oxus is intending to develop this resource and to be in production by 2005.

### **Amantaytau Goldfields (AGF)**

Oxus has a 50% interest in and controls the operational management of the AGF project. The Amantaytau gold and gold-silver mineral deposits are located within a 192 km exploration area in the Kyzylkum region of central Uzbekistan. The property is situated close to the open pit gold mining complex at Muruntau, which, as one of the largest open pit gold mines in the world, produced 1.8Moz of gold in 2002 and is operated by the State-owned Navoi Mining and Metallurgical Combinat.

## Khandiza

Khandiza is a high-grade zinc, silver, copper and lead deposit located in the Sariasia region of southeast Uzbekistan. The deposit contains a reported resource of 6.9 Mt at a 26% zinc equivalent grade. Significant exploration potential also exists within 6,000 km<sup>2</sup> of attached licence areas. In October 2002, Oxus was granted the exclusive rights to develop Khandiza through either a concession agreement or a production sharing agreement, thereby owning the local operating company 100%.

## Jerooy

Jerooy is the largest known unexploited gold deposit within the Kyrgyz Republic and is located in the north-central part of the country, some 190 km from the capital Bishkek and 40 km southeast of the provincial capital of Talas. Oxus, through its subsidiary, Norox, holds a 66.67% interest in the project.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
