Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Pacific Bepure Industry Inc. business.

About Pacific Bepure Industry Inc.

Pacific Bepure Industry Inc., through its subsidiaries, engages in the development, research, designing, manufacturing, and sale of a series of casual footwear, men's and ladies' and sports footwear mainly in the People's Republic of China (the PRC), as well as in the South America. The company's principal subsidiaries are Fujian Jinjiang Pacific Shoes Co., Limited and Fujian Baopiao Light Industry Co., Limited.

Products

The company markets its products primarily under the brand name Chinese Graphic or Baopiao in English translation. The company's Baopiao branded sports and casual products target at both female and male customers, while its products are principally available for ladies.

The company's consumers are aged between 18 and 48 years old. In particular, it targets at consumers aged between 20 and 35 years old. It principally targets the following customers: 18-48 years old female urban customers, including dwellers, students, office ladies, housewives, the females who live in the second and third tier cities or countryside; and 18-40 years old male customers, including students, urban

dwellers, and the males who live in the second and third tier cities or countryside.

The company's Baopiao branded products would be divided into the following five broad series: business series, travelling series, outdoor series, casual series, and casual sports series.

Sales and Marketing

The company sells its products on a wholesale basis to its distributors who are responsible for distribution to retail outlets which sell its products to consumers. Through its distributors, the sales network of its products has covered 24 Chinese provinces and administrative regions in various modes, such as retail outlets, counters in department stores and shopping malls, and wall racks in supermarkets. In addition, its products, including its branded products and original design manufacturer (ODM) products, sold to the South America through local and Taiwan distributor, Taiwan Quanyi Xingye Co., Ltd.

Competition

The company's competitors in the footwear market include sports footwear brands, such as Nike, Li Ning, and Anta; and casual footwear brands, such as BELLE group, Teenmix, and Saturday.

History

Pacific Bepure Industry Inc. was found in 1993.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
