The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Pacific Copper Corp. business.

About Pacific Copper Corp.

Pacific Copper Corp., an exploration stage mining company, focuses on the exploration and development of mineral claims located in Chile and Peru.

Properties

The company's subsidiary, Sociedad Pacific Copper Chile Limitada (a Chilean limited liability partnership), holds or controls mining concessions in the Corral/Mofralla, Venapai, Guanaca, Carrizal, Cerro Blanco, and Carrera Pinto mining districts of Chile and certain other areas in Atacama Region III of Chile (the Chile Claims). The company also has a subsidiary, Pacific Copper Peru SRL (a Peruvian limited liability partnership) that holds claims in the Medalla Milagrosa district of Peru (the Peru Claims). Its primary properties include the La Guanaca, El Corral/La Mofralla, and the Venapai properties in Chile.

Chilean Oxide/Leachable Copper Projects

La Guanaca Chile Copper Oxide Property: The company, through its subsidiary, Sociedad Pacific Copper Chile Limitada (Pacific LTDA), entered into an exploration, mining, and exploitation agreement for the La Guanaca oxide copper project located

northeast of the town of Inca de Oro, Chanaral Province, Atacama Region 3, Chile. This property consists of approximately 250 hectares of exploration concessions.

El Corral/La Mofralla and Venado Chile Oxide/Leachable Copper Properties: The company's, through its wholly owned subsidiary, Pacific LTDA, acquired a 100% interest in the following copper oxide or leachable copper properties located in Atacama Region III, Chile: the Venado Property (also known as the Venapai Property) consisting of approximately 5,000 hectares of exploration concessions, located approximately 45 kilometers from the city of Copiapo; the El Corral Property, consisting of approximately 3,600 hectares of exploration concessions, located approximately 60 kilometers from the city of Copiapo, and the adjacent 'La Mofralla Property', consisting of approximately 250 hectares of exploration concessions also located approximately 60 kilometers from the City of Copiapo.

Carrera Pinto District

The company has three porphyry targets in a group of properties totaling approximately 2,750 hectares of constituted exploration concessions.

Turkesa properties: The Turkesa properties cover approximately 700 hectares, with an additional 500 contiguous hectares covered by a filing, covering a porphyry target and crossing mantos.

Cobrizo Properties: The Cobrizo properties cover 2,000 hectares of registered exploration concessions with additional amounts filed totaling an additional 600 hectares.

Cerro Blanco District

The company controls approximately 70% in this area. The property consists of 940 hectares of registered exploration concessions. Cerro Blanco is located approximately 90 kilometers south of Copiapo.

Carrizal District

The company holds interest in the 1,100 hectares of registered mining property in this area.

History

The company was founded in 1999. It was formerly known as Gate-1 Financial, Inc. and changed its name to Pacific Copper Corp. in 2006.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
