Abstracts

PainCare Holdings Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between PainCare Holdings Inc. and its competitors. This provides our Clients with a clear understanding of PainCare Holdings Inc. position in the Industry.

The report contains detailed information about PainCare Holdings Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for PainCare Holdings Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The PainCare Holdings Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes PainCare Holdings Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of PainCare Holdings Inc. business.

About PainCare Holdings Inc.

PainCare Holdings, Inc., a health care services company, provides pain-focused medical and surgical solutions in the United States and Canada.

The company diagnoses and treats pain stemming from neurological and musculoskeletal conditions and disorders. The company owns or manages 24 pain-focused physician practices offering such services as: pain management, minimally invasive spine surgery and ancillary services including; orthopedic rehabilitation, electrodiagnostic medicine, intra-articular joint injections and diagnostic imaging services.

The company has relationships with 59 physician practices and ambulatory surgery center locations. Through its subsidiaries, the company operates three types of practice arrangements: the company employs licensed physicians in 12 practices which it owns; the company has acquired the non-medical assets and it provides general management services to 19 physician practices; the company provides limited management services to 35 physician practices in areas such as physical therapy, electrodiagnostic services and intra-articular joint injection programs.

Through its wholly owned subsidiary, Integrated Pain Solutions (IPS), which is

developing, administering and tracking the outcome of proprietary, evidence-based, clinical pathways for the management of acute or chronic pain. These clinical criteria would serve as the basis of the delivery of quality care by credentialed, multi-disciplined provider networks contracted and managed by IPS in select U.S. markets.

In addition to its 4 wholly owned physician practices and 17 managed physician practices, the company provides limited management services and equipment to 35 other practices throughout the country, including orthopedic rehabilitation, electrodiagnostic services and intra-articular joint therapy and equipment. The company also wholly owns 7 single-specialty ambulatory surgery centers and the majority interest in two free standing multi-specialty ambulatory surgery centers.

Segments

The company operates in three segments: pain management, surgery, and ancillary service.

PAIN MANAGEMENT

The company's pain management segment provides treatment through interventional and non-interventional therapies that treat both the chronic and acute pain patient. Its pain management facilities are located in eight states in the United States and one province in Canada.

As of December 31, 2006, the company's pain management segment operated 16 facilities (four of which are wholly owned and 12 of which are managed contracts). Its pain management segment provides services to patients who are in need of such services as therapeutic injections, radio frequency treatments and both physical and behavioral therapy.

Pain management has emerged as a separate specialty in medicine. Some of the common approaches to the treatment of pain include:

Analgesics: Pharmaceutical treatments for pain include nonopioid analgesics, including nonsteroidal anti-inflammatory drugs (NSAIDs), such as aspirin and acetaminophen, opioid analgesics, such as morphine, and other drugs that have analgesic properties that are useful in treating pain, such as certain antiepileptic and antidepressant drugs.

Diagnostic Injection: Injection of anesthetics and anti-inflammatory agents directly into

the area surrounding the pain generating nerve can relieve pain symptoms and often allow the nerve area to heal and repair itself. These injections, often known as 'epidural or facet blocks', allow the pain specialist to identify the specific anatomic structure that is generating the pain response.

Implantable Pumps: Implantable pain pumps are devices inserted in the patient's body that delivers a constant dose of anesthetic to a particular region of the body. The pain specialist can alter the level of anesthetic delivered depending on patient need. Implantable pumps are often used to treat cancer pain or severe back pain.

Neuromodulation Devices: Neuromodulation devices such as implantable stimulators or pumps are used to treat chronic pain by altering nervous system activity either electrically or pharmacologically.

Radio Frequency Nerve Ablation

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
