The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Paramount Gold and Silver Corp. business.

About Paramount Gold and Silver Corp.

Paramount Gold and Silver Corp., an exploration stage mining company, engages in the exploration and development of precious metals (gold and silver exploration properties) in Mexico.

The company's wholly owned subsidiaries include Paramount Gold de Mexico S.A. CV and Magnetic Resources Ltd., which owns Minera Gama, S.A. de C.V. (Minera Gama) holds interests in mineral concessions in Mexico known as the Temoris project and the Morelos project, as well as a royalty interest in the Iris project. In 2010, the company's drilling had concentrated on the San Francisco target area, where 8 core holes (2572 meters) and 13 reverse circulation holes (4192) have been drilled.

Properties

San Miguel Project

The company, through its wholly owned Mexican subsidiary, Paramount Gold de Mexico S.A. de C.V., owns a 100% interest in the San Miguel property. The San Miguel Project is located in southwestern Chihuahua in northern Mexico. The project consists of 17 smaller concessions clustered near Guazapares, Chihuahua with a total area of

427.17 hectares plus the Andrea, Gissel, and Isabel concessions; the Elyca concession and a joint venture agreement with Garibaldi Resources Corporation as part of a district wide exploration program.

San Miguel Group Agreement: The San Miguel Grouping includes the concessions San Miguel, San Juan, San Luis, Empalme, Sangre de Cristo, Santa Clara, El Carmen, Las Tres BBB, Swanwick, Las Tres SSS, El Rosario, and Guadalupe de Los Reyes, a total of 275 hectares. The San Miguel Groupings were acquired by Corporacion Amermin S.A. (Amermin), a subsidiary of Tara Gold.

La Blanca Agreement: The company owns various mining concessions, including the Montecristo, Montecristo II, Monecristo Fraccion, and Constituyentes 1917 concessions, a total of 131 hectares.

The Santa Cruz concession totals 10 hectares. The company owns a 100% interest in the concession and awaits title transfer from Tara Gold. The Elyca concession, totaling 10.0924 hectares, was purchased from Minera Rio Tinto, S.A. de C.V.

Mexoro: The company acquired the Guazapares claims from the Mexican subsidiary of Mexoro Minerals to the Mexican subsidiary of it.

Other: The company staked the Andrea, Gissel, and Isabel concessions that form the Andrea Project east of the San Miguel Project totaling approximately 84,000 hectares. It owns a 100% interest in these claims.

Ejido Agreements: The company has signed agreements with two ejidos, or surface-owner councils. In April 2010, it signed an agreement with an additional Ejido covering the purchased concessions.

Acquisitions

In August 2010, the company acquired the common stock of X-Cal Resources Ltd. (X-Cal). The principal asset of X-Cal is the Sleeper Gold Mine located in Humboldt County, Nevada. It also intends to conduct metallurgical testing on the 714,000 ounces of gold sitting above ground.

History

Paramount Gold and Silver Corp. was founded in 2005.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
