The Paramount Resources Ltd. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and

company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Paramount Resources Ltd. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Paramount Resources Ltd. business.

### **About Paramount Resources Ltd.**

Paramount Resources Ltd., an independent energy company, engages in the exploration, development, production, processing, transportation, and marketing of natural gas, crude oil and natural gas liquids.

The company's primary properties are located primarily in Alberta, the Northwest Territories and British Columbia in Canada, and in North Dakota and Montana in the United States.

Kaybob, Alberta

The Kaybob Corporate Operating Unit (COU) produces natural gas, natural gas liquids (NGLs), and crude oil in West Central Alberta. The core natural gas producing areas in Kaybob include Musreau, Resthaven and Smoky and the primary crude oil producing area is Kakwa, Musreau, and Smoky areas. The company owns a 50 percent working interest in a 25 MMcf/d plant, a 10 percent working interest in a 100 MMcf/d plant, and a 10 percent working interest in a 40 MMcf/d plant.

As of December 31, 2009, reserves in the Kaybob COU totaled 5.0 MMBoe of proved reserves that were 86 percent natural gas weighted and 2.8 MMBoe of probable

reserves that were 89 percent natural gas weighted. Paramount operates approximately 56 percent of its production in the Kaybob COU.

#### Grande Prairie, Alberta

The Grande Prairie COU (Grande Prairie or the Grande Prairie COU) produces natural gas, NGLs, and crude oil in Central Alberta. The natural gas producing areas in Grande Prairie include properties at Mirage, Karr-Gold Creek, and Ante Creek. Grande Prairie's primary crude oil producing property is in the deep, light sweet oil trend at Crooked Creek. Grande Prairie has also initiated a longer-term Deep Basin development for liquids tight gas in the Karr-Gold Creek area.

As of December 31, 2009, reserves in the Grande Prairie COU consisted of 17.3 Bcfe of proved reserves that were 67 percent natural gas weighted and 10.1 Bcfe of probable reserves that were 51 percent natural gas weighted. Paramount operates approximately 75 percent of its production in the Grande Prairie COU.

The company operates 7 compressor sites in the Grande Prairie COU at Mirage, Karr and Goose River, with an average working interest of approximately 85 percent. It also operates three oil batteries in Grande Prairie, including 2 oil batteries at Mirage (in which Paramount has a 100 percent interest), and 1 oil battery at Ante Creek (in which Paramount has a 57.5 percent interest).

#### Northern Alberta/Northwest Territories/Northeast British Columbia

The Northern COU (Northern or the Northern COU) includes properties in Northwest Alberta, Northeast British Columbia and extends into the Cameron Hills and Fort Liard areas of the Northwest Territories. Other significant natural gas producing properties within Northern are located at Bistcho and Haro in Northwest Alberta and Clarke Lake in Northeast British Columbia.

As of December 31, 2009, reserves in the Northern COU totaled 4.9 MMBoe of proved reserves that were 82 percent natural gas weighted and 4.4 MMBoe of probable reserves that were 91 percent natural gas weighted. Paramount operates approximately 84 percent of its production in the Northern COU.

In the Northern COU, the company operates 1 sour gas plant at Bistcho Lake, in which Paramount has a 59 percent interest, which processes gas from both Bistcho and from Cameron Hills in the Northwest Territories, and 1 sweet gas plant at East Negus, in

which Paramount has an 85 percent interest. It also operates an oil battery at Cameron Hills, in which Paramount has an 88 percent interest. Natural gas from the Haro property is processed at an approximately 50 percent owned third-party operated gas plant. Natural gas is also processed at third-party operated facility in Clarke Lake, British Columbia.

## Southern Alberta and USA

The Southern COU ('Southern' or the 'Southern COU') produces crude oil and natural gas in Southern Alberta, North Dakota and Montana. Southern's core areas comprise the gas producing Chain / Craigmyle field near Drumheller, Alberta and the oil producing area near Medora, North Dakota.

As of December 31, 2009, reported reserves in this COU were 8.0 MMBoe of proved reserves that were approximately 58 percent natural gas weighted and 2.6 MMBoe of probable reserves that were approximately 62 percent natural gas weighted. The company operates approximately 92 percent of its production in Southern.

The company owns and operates one gas plant at Chain/Craigmyle. Approximately 60 percent of the natural gas produced in the Southern COU is processed at this plant. Approximately 80 percent of the total oil production in Southern utilizes Company-operated batteries, in which Paramount has working interests ranging from 39 to 100 percent.

## Other Properties

The company has minor properties in Northeast Alberta.

## History

Paramount Resources Ltd. was founded in 1978.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

### Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

### **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
