company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Park-Ohio Holdings Corp. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Park-Ohio Holdings Corp. business.

### **About Park-Ohio Holdings Corp.**

Park-Ohio Holdings Corp., through its subsidiaries, operates as an industrial supply chain logistics and diversified manufacturing company in the United States, Asia, Canada, Mexico, and Europe. The company's serves industrial original equipment manufacturers (OEMs) in various industrial sectors, including the automotive and vehicle parts, heavy-duty truck, industrial equipment, steel, rail, electrical distribution and controls, aerospace and defense, oil and gas, power sports/fitness equipment, HVAC, electrical components, appliance, and semiconductor equipment industries.

### **Segments**

The company operates through three segments: Supply Technologies, Aluminum Products, and Manufactured Products.

### **SUPPLY TECHNOLOGIES**

Supply Technologies provides its customers with Total Supply Management, a proactive solutions approach that manages the efficiencies of every aspect of supplying production parts and materials to its customers' manufacturing floor, from strategic planning to program implementation. Total Supply Management includes such services

as engineering and design support, part usage and cost analysis, supplier selection, quality assurance, bar coding, product packaging and tracking, just-in-time and point-of-use delivery, electronic billing services and ongoing technical support. The company operates 40 logistics service centers in the United States, Mexico, Canada, Puerto Rico, Scotland, Ireland, Hungary, China, Taiwan, Singapore, and India, as well as production sourcing and support centers in Asia. Through its supply chain management programs, the company supplies approximately 175,000 globally-sourced production components.

## Products and Services

Total Supply Management provides its customers with a partner in strategic planning, global sourcing, technical services, parts and materials, logistics, distribution and inventory management of production components. In addition, Supply Technologies delivers a range of production components, including valves, electro-mechanical hardware, fittings, steering components, and many others. As an additional service, Supply Technologies provides spare parts and aftermarket products to end users of its customers' products. Total Supply Management services are typically provided to customers pursuant to sole-source arrangements.

The Supply Technologies segment also engineers and manufactures precision cold formed and cold extruded products, including locknuts, SPAC nuts, and wheel hardware, which are principally used in applications where controlled tightening is required due to high vibration. Supply Technologies produces both standard items and specialty products to customer specifications, which are used by customers in the automotive, heavy-duty truck and rail industries.

**Markets and Customers:** Supply Technologies markets and sells its services to approximately 5,400 customers domestically and internationally. The principal markets served by Supply Technologies are the heavy-duty truck, automotive and vehicle parts, electrical distribution and controls, consumer electronics, power sports/fitness equipment, recreational vehicles, HVAC, agricultural and construction equipment, semiconductor equipment, aerospace and defense, and appliance industries. The company's major customer is Navistar, Inc.

## ALUMINUM PRODUCTS

The Aluminum Products business casts and machines aluminum engine, transmission, brake, suspension and other components for automotive, agricultural equipment, construction equipment, heavy-duty truck, and marine equipment OEMs, primarily on a

sole-source basis. Aluminum Products' principal products include front engine covers, cooling modules, control arms, knuckles, pump housings, clutch retainers and pistons, master cylinders, pinion housings, oil pans, and flywheel spacers. In addition, the company provides value-added services, such as design engineering, machining, and part assembly.

## MANUFACTURED PRODUCTS

Manufactured Products segment operates a group of manufacturing businesses that design and manufacture a range of products, including induction heating and melting systems, pipe threading systems, rubber products, and forged and mac

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

### **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

### **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
