Abstracts

Parker Hannifin Corporation Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Parker Hannifin Corporation and its competitors. This provides our Clients with a clear understanding of Parker Hannifin Corporation position in the [Heavy Machinery](#) Industry.

The report contains detailed information about Parker Hannifin Corporation that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Parker Hannifin Corporation. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Parker Hannifin Corporation financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and

company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Parker Hannifin Corporation competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Parker Hannifin Corporation business.

About Parker Hannifin Corporation

Parker-Hannifin Corporation manufactures motion and control technologies and systems, including fluid power systems, electromechanical controls, and related components. The company also produces fluid purification, fluid and fuel control, process instrumentation, air conditioning, refrigeration, electromagnetic shielding, and thermal management products and systems.

The company's motion and control technologies and systems are used in the products of its three principal business segments, including Industrial; Aerospace; and Climate & Industrial Controls.

PRODUCTS

Industrial Segment

The Industrial Segment's principal products consist of a range of motion and control technologies and systems.

Automation Group: The Automation Group offers pneumatic and electromechanical components and systems, including air preparation units; pneumatic accessories;

pneumatic actuators and grippers; pneumatic valves and controls; structural extrusions; vacuum generators, cups and sensors; AC/DC drives and systems; electric actuators, gantry robots and slides; human-machine interfaces; manifolds; rotary actuators; and stepper motors, servo motors, drives, and controls.

The Filtration Group offers filters, systems, and instruments to monitor and remove contaminants from fuel, air, oil, water and other liquids and gases, including analytical gas generators; compressed air and gas filters and dryers; condition monitoring devices; engine air, fuel and oil filtration and systems; hydraulic, lubrication and coolant filters; nitrogen, hydrogen and zero air generators; process, chemical, water and microfiltration filters; and water desalinization and purification.

The Fluid Connectors Group offers connectors which control, transmit and contain fluid, including connectors for low pressure fluid conveyance; deep sea umbilicals; diagnostic equipment; hose couplings; industrial hose; mooring systems and power cables; PTFE hose and tubing; quick couplings; check valves; rubber and thermoplastic hose; tube fittings and adapters; and tubing and plastic fittings.

The Hydraulics Group offers hydraulic components and systems for builders and users of industrial and mobile machinery and equipment, including accumulators; cartridge valves; human machine interfaces; hydraulic transmissions; hydraulic cylinders; hydraulic motors and pumps; hydraulic systems; hydraulic valves and controls; hydrostatic steering units; integrated hydraulic circuits; power take-off equipment; power units; rotary actuators; and sensors.

The Instrumentation Group offers critical flow components for process instrumentation, healthcare, and ultra-high-purity applications, including analytical sample conditioning products and systems; chemical injection fittings and valves; fluoropolymer chemical delivery fittings, valves and pumps; gas delivery fittings, valves, regulators and digital flow controllers; process control fittings, valves, regulators and manifold valves; process control double block and bleeds; permanent no-weld tube fittings; precision industrial regulators and flow controllers; and industrial mass flow meters/controllers.

The Seal Group offers static and dynamic sealing devices, including dynamic seals, elastomeric o-rings; electromagnetic interference shielding; extruded and precision-cut fabricated elastomeric seals; high-temperature metal seals; homogeneous and inserted elastomeric shapes; medical devices; medical seals and instruments; metal and plastic retained composite seals; and thermal management products.

Aerospace Segment

The Aerospace Segment's principal products include flight control, hydraulic, fuel, fluid conveyance, and engine systems and components are used on commercial and military airframe and engine programs. The Aerospace Segment offers primary and secondary flight control systems and components, including hydraulic, electrohydraulic, electric backup hydraulic, electrohydrostatic, and electromechanical components used for precise control of aircraft rudders, elevators, ailerons, and other aerodynamic control surfaces.

The Aerospace Segment also offers hydraulic systems and components, including engine-driven pump

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
