term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes PartnerRe Ltd. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of PartnerRe Ltd. business.

About PartnerRe Ltd.

PartnerRe Ltd., through its wholly owned subsidiaries, provides reinsurance on a worldwide basis. The company reinsures various risks, including property, casualty, motor, agriculture, aviation/space, catastrophe, credit/surety, engineering, energy, marine, specialty property, specialty casualty, multiline and other lines, and life/annuity and health. It also offers alternative risk products that include weather and credit protection to financial, industrial, and service companies.

The company's wholly owned subsidiaries include Partner Reinsurance Company Ltd. (Partner Reinsurance); Partner Reinsurance Europe Limited (PartnerRe Europe); Partner Reinsurance Company of the U.S. (PartnerRe U.S.); PARIS RE SA (Paris Re France); and PARIS RE Switzerland AG (Paris Re Switzerland).

Reinsurance Operations

The company provides reinsurance for its clients in approximately 150 countries worldwide. Through its branches and subsidiaries, it provides reinsurance of non-life and life risks of ceding companies (primary insurers, cedants or reinsureds) on either a proportional or non-proportional basis through treaties or facultative reinsurance. The company's offices are located in Beijing, Bermuda, Dublin, Greenwich (Connecticut),

Hong Kong, Labuan, Mexico City, Miami, Montreal, New York, Paris, Santiago, Sao Paulo, Seoul, Singapore, Tokyo, Toronto, Washington, D.C., Zug, and Zurich.

The company monitors the performance of its operations primarily in two segments, Non-life and Life. The Non-life segment is further divided into five sub-segments: U.S., Global (Non-U.S.) Property and Casualty (Global (Non-U.S.) P&C), Global (Non-U.S.) Specialty, Catastrophe, and Paris Re.

The U.S. sub-segment includes property, casualty, motor, multiline, agriculture, surety, and other risks generally originating in the United States. The Global (Non-U.S.) P&C sub-segment includes property, casualty, and motor business generally originating outside of the United States. The Global (Non-U.S.) Specialty sub-segment comprises business that is generally considered to be specialized due to the technical underwriting required to analyze risks, and is global in nature. This sub-segment consists of various lines of business, including agriculture, aviation/space, credit/surety, engineering, energy, marine, specialty property, specialty casualty, and other lines. The Catastrophe sub-segment comprises catastrophe line of business. The Paris Re sub-segment includes agriculture, aviation/space, catastrophe, credit/surety, energy, engineering, marine, motor, property, specialty casualty, specialty property, and other lines underwritten by Paris Re. The Life segment includes life, health, and annuity lines of business.

Property—The company's property business provides reinsurance coverage to insurers for property damage or business interruption losses resulting from fires, catastrophes and other perils covered in industrial and commercial property and homeowners' policies and is written on both a proportional and non-proportional basis, including structured reinsurance of property risks. The company's primary exposure is typically to losses from windstorm and earthquake. It also exposed to losses from sources, such as freezes, riots, floods, industrial explosions, fires, hail, and other loss events. The company's primary exposure under these property coverages is to property damage. Other risks include business interruption and other non-property losses may also be covered under a property reinsurance contract when arising from a covered peril. Its property reinsurance treaties generally exclude certain risks, such as war, nuclear, biological and chemical contamination, radiation, and environmental pollution.

Casualty—The company's casualty business includes third party liability, employers' liability, workers' compensation, and personal accident coverages written on both a proportional and non-proportional basis, including structured reinsurance of casualty risks.

Multiline—The company's multiline business provides both property and casualty reinsurance coverages written on both a proportional and non-proportional basis.

Motor—The company's

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
