Abstracts

Patient Access Solutions, Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Patient Access Solutions, Inc. and its competitors. This provides our Clients with a clear understanding of Patient Access Solutions, Inc. position in the Industry.

The report contains detailed information about Patient Access Solutions, Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Patient Access Solutions, Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Patient Access Solutions, Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and

company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Patient Access Solutions, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Patient Access Solutions, Inc. business.

About Patient Access Solutions, Inc.

Patient Access Solutions, Inc. operates as a healthcare technology solutions company. The company develops and markets the PASHealth Web Portal System and POS terminal solution.

The PASHealth Web Portal System and POS terminal solution offer electronic medical eligibility, electronic referrals, service authorizations, and electronic claims processing. It also offers electronic medical records and patient data; and automates the labor intensive and expensive manual process, which is used by various facilities and healthcare providers. The Web Portal System and POS terminal solution provides a range of self pay receivable management solutions for the healthcare facilities.

Products

The company's PAS Web Portal System offers the following services for managing the healthcare data:

Patient Access Data Center: It includes real-time and batch medical eligibility/benefit verification-a real time and batch procedure that determines a patient's health insurance coverage.

D-PAS-Digital Pen & Paper: It offers D-PAS solution that utilizes digital pen and paper to capture handwritten information from the doctor or office personnel and transfer it into a digital form into the PAS Web portal, as well as to utilize the data to initiate workflows in a secure environment.

Claims Analyzer: It includes claims processing, which pertain to the creation and submission of claims; electronic referrals include the referral program, which allow a primary care physician to submit to a secondary physician referrals to the patient's insurance carrier of managed care plans; claims status includes checking the pending claims submitted to insurance payers; electronic remittance advice allows for the electronic return of EOB's to the provider; and service authorization used to authorize services prior to a procedure.

Payment Module: It includes credit/debit card services that provide payment options for patient self-pay responsibilities; healthcare savings accounts (HSA's) that includes acceptance of healthcare saving account cards at the point of service; and check services that reduce the provider's risk of accepting and incurring losses from returned checks.

Significant Events

On August 16, 2010, Patient Access Solutions, Inc. announced a partnership with iMedicor, Inc. The partnership would provide a complementary synergy of combined products and services that would enable enhanced information exchange capabilities by integrating the iMedicor portal with Patient Access Solution's digital pen technology for the home healthcare industry and HIPAA transaction processing and reporting platform.

History

Patient Access Solutions, Inc. was founded in 2006.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
