The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of PC Connection, Inc. business.

About PC Connection, Inc.

PC Connection, Inc. is a direct marketer of information technology (IT) solutions. The company helps companies design, enable, manage, and service their IT environments.

The company provides products and services, including computer systems, software and peripheral equipment, networking communications, and other products and accessories that the company purchases from manufacturers, distributors, and other suppliers. The company also offers a range of installation, configuration, repair, and other services performed by its personnel and third-party providers.

Segments

The company conducts its business operations through three primary business segments: SMB (small- to medium-sized businesses), Large Account, and Public Sector.

SMB segment: The company's principal target customers in this segment are small-to-medium-sized business customers with 20 to 1,000 employees. The company's primary means of marketing to this segment incorporate all three sales channels—outbound

telemarketing, primarily to its business customers; inbound telesales, particularly to its consumer group and very small business customers; and online Internet sales to both consumer and business customers.

Large Account segment: Through its MoreDirect subsidiary's custom designed Web-based system, the company offers its larger corporate customers a method of sourcing, evaluating, purchasing, and tracking a variety of IT products and services. MoreDirect places its product orders with manufacturers and/or distribution companies for drop shipment directly to its customers.

Public Sector segment: The company uses a combination of outbound telemarketing, including some on-site sales solicitation by field sales account managers, and online Internet sales through Internet Business Accounts, to reach these customers. Through its GovConnection subsidiary, the company targets each of the four distinct market sectors with in this segment—federal government, higher educational institutions, school grades K-12, and state and local governments.

Products

The company offers its customers approximately 180,000 information technology products designed for business applications from approximately 1,400 manufacturers, including hardware and peripherals, accessories, networking products, and software. As part of its merchandising strategy, the company also offers products related to PCs, such as digital cameras and digital media players.

Customers

The company's principal customers are SMBs (comprised of 20 to 1,000 employees), medium-to-large corporate accounts, and government and educational institutions.

Competition

The company competes with other direct marketers of IT products, including CDW Corporation and Insight Enterprises, Inc. The company also competes with certain product manufacturers that sell directly to customers, such as Dell Inc., as well as with HP, Lenovo, and Apple.

History

PC Connection, Inc. was founded in 1982.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
