The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of PDG Environmental Inc. business.

About PDG Environmental Inc.

PDG Environmental, Inc., through its wholly-owned subsidiaries, provides environmental and specialty contracting services, including asbestos and lead abatement, insulation, microbial remediation, emergency response, loss mitigation and reconstruction, demolition and related services throughout the United States. The company has three subsidiaries: Project Development Group, Inc.; PDG, Inc.; and Enviro-Tech Abatement Services Co.

Services

Asbestos Abatement: The company operates in various types of asbestos abatement, including removal and disposal, enclosure and encapsulation. Asbestos abatement projects have been performed in commercial buildings, government and institutional buildings, schools, hospitals and industrial facilities for both the public and private sector.

Disaster Response/Loss Mitigation: The company's services include emergency response, loss mitigation and structural drying, for both buildings and infrastructure. It provides services in various areas of the emergency response/restoration industry.

Reconstruction: Reconstruction services are usually provided after the impact of the event has been assessed by the property owner and their insurance company. The majority of the work performed on reconstruction contracts has been performed by subcontractors.

Mold Remediation: The company provides mold remediation services in both commercial and residential structures. Such services include decontamination, application of biocides and sealant, removal of building systems (drywall, and carpet), and disposal of building furnishings. The company involves in remediation, detailing methods and performing microbial (mold, and fungus) abatement in commercial, residential, educational, medical and industrial facilities.

Lead Abatement: The company utilizes various methods to remove lead-based paint that is adhered to surfaces and the removal of loose and flaking lead-based paint and dust or lead-contaminated soil. Removal methods include chemical stripping, wet scraping, needle gun, high-pressure water/vacuum and abrasive blasting. High-efficiency particulate air (HEPA) vacuums are utilized for dust and debris clean up. Analysis of removed material, as required, is performed to assure proper disposal of lead- contaminated waste and debris generated from removal operations.

Demolition: The company has limited its services to the performance of select interior and structural demolition. Its services includes interior and structural demolition in occupied buildings at times utilizing specially equipped air filtration devices to minimize airborne dust emissions in occupied areas.

Customers

The company serves private sector clients; government; and public institutions.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
