The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and

company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Penske Automotive Group, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Penske Automotive Group, Inc. business.

About Penske Automotive Group, Inc.

Penske Automotive Group, Inc. operates as an automotive retailer in the United States. As of December 31, 2009, the company owned and operated 158 franchises in the U.S. and 148 franchises outside of the U.S., primarily in the U.K.

The company's dealerships offer a selection of new and used vehicles for sale. In addition to selling new and used vehicles, the company offers maintenance and repair services, and the sale and placement of higher-margin products, such as third party finance and insurance products, third-party extended service contracts and replacement and aftermarket automotive products.

The company, through smart USA Distributor, LLC (smart USA), a wholly-owned subsidiary, is a distributor of the smart fortwo vehicle in the U.S. and Puerto Rico. The smart fortwo is manufactured by Mercedes-Benz Cars and is a Daimler brand. As of December 31, 2009, smart USA had certified a network of approximately 75 smart dealerships, 9 of which are owned and operated by the company.

The company, in June 2008, acquired a 9.0% limited partnership interest in Penske Truck Leasing Co., L.P. (PTL), a global transportation services provider, from subsidiaries of General Electric Capital Corporation (collectively, 'GE Capital'). PTL

operates and maintains approximately 200,000 vehicles and serves customers in North America, South America, Europe and Asia. Product lines include full-service leasing, contract maintenance, commercial and consumer truck rental and logistics services, including, transportation and distribution center management and supply chain management.

smart USA: smart USA, a wholly-owned subsidiary, is the distributor of the smart fortwo vehicle in the U.S. and Puerto Rico and is responsible for maintaining a vehicle dealership network. In 2009, smart USA wholesaled 13,772 smart fortwo vehicles, as well as various service parts and accessories.

Non-U.S. Operations: Sytner Group, the company's wholly-owned U.K. subsidiary, is a retailer of vehicles in the U.K. As of December 31, 2009, Sytner operated 139 franchises, representing approximately 20 brands.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
