Abstracts

Pentair, Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Pentair, Inc. and its competitors. This provides our Clients with a clear understanding of Pentair, Inc. position in the [Heavy Machinery](#) Industry.

The report contains detailed information about Pentair, Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Pentair, Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Pentair, Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your

company's decision-making processes.

In the part that describes Pentair, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Pentair, Inc. business.

About Pentair, Inc.

Pentair, Inc. operates as a diversified industrial manufacturing company worldwide.

Segments

The company operates in two segments, Water Group and Technical Products Group.

WATER GROUP

The Water Group provides products and systems used worldwide in the movement, storage, treatment, and enjoyment of water. It offers various products and systems to multiple markets and customers. Its target market includes flow technologies, filtration, and pool.

Residential Flow Market: The company's Residential Flow business serves the global residential water pump market. Its primary markets are those serving residential well water installers, distributors and residential end users; waste water dealers and distributors; and participants in the agricultural irrigation and crop protection industries. The company also has offerings into the RV / Marine and Mobile Fire markets. It addresses these markets with products ranging from light duty diaphragm pumps to submersible, sump and sewage pumps to pumps for agricultural irrigation and crop

spraying. In addition to pumps, the company offers pressure tanks for multiple residential applications. Application for its range of products includes pumps for fluid delivery, circulation, transfer, pressure boosting, and engine cooling.

Residential Filtration Market: The company's Residential Filtration business serves the residential and commercial water softening and filtration markets globally. The company addresses the market with control valves, pressure tanks, membranes, carbon products, point of entry and point of use systems, and other filter cartridges. Residential Filtration products are used in the manufacture of water softeners; filtration and deionization systems; and commercial and residential water filtration applications.

Pool Market: The company addresses the Pool equipment market with a line of commercial and residential pool equipment and accessories, including pumps, filters, heaters, lights, automatic controls, automatic pool cleaners, commercial deck equipment, maintenance equipment, and pool accessories. Applications for its pool products include commercial and residential pool construction, maintenance, repair, and service.

Engineered Flow Market: The company's Engineered Flow business serves the municipal, commercial, and industrial water and fluid handling markets. Its primary markets are those serving commercial end-users; waste water dealers and distributors; commercial and industrial operations; and municipal water treatment facilities. The company addresses these markets with products ranging from light duty diaphragm pumps to high-flow turbine pumps and solid handling pumps designed for water, wastewater and a variety of industrial applications. Applications for its range of products include pumps for municipal wells, water treatment, wastewater solids handling, pressure boosting, engine cooling, fluid delivery, circulation, fire suppression, and transfer.

Filtration Solutions: The company's Filtration Solutions business serves the commercial and industrial markets. It addresses these markets with filter systems, filter cartridges, pressure vessels, and specialty dispensing pumps providing flow solutions for specific end-user market applications including, commercial, foodservice, industrial, marine, and aviation. Filtration products are used in the manufacture of filtration, deionization, and desalination systems; industrial and commercial water filtration applications; and filtration and separation technologies for hydrocarbon, medical, and hydraulic applications.

Customers: The company's Water Group distributes its products through wholesale

distributors, retail distributors, original equipment manufacturers, home centers, and home and pool builders.

TECHNICAL PRODUCTS GROUP

The Technical Products Group operates in the global enclosures and thermal management markets. It designs and manufactures standard, modified, and custom enclosures that house and protect sensitive electronics and electrical components and protect the people that use them.

The company's Technical Products Group focuses its business portfolio on eight primary vertical markets: industrial, communications, general electronics, energy, commercial, security and defense, infrastructure, and medical. Products include metallic and composite enclosures, cabinets, cases, subracks, backplanes, and associated thermal management systems. Applications served include industrial machinery, data communications, networking, telecommunications, test and measurement, automotive, medical, security, defense, and general electronics.

Customers: The company's Technical Products Group distributes its products through electrical and data contractors, electrical and electronic components distributors, and original equipment manufacturers.

History

Pentair, Inc. was founded in 1966.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
