Such information creates your awareness about principal trends of Peoples Financial Corp. business.

About Peoples Financial Corp.

Peoples Financial Corporation operates as the holding company for The Peoples Bank, which provides banking services to individuals and small to middle market businesses in Mississippi.

The company's main office, operations center, and asset management and trust services are located in downtown Biloxi, Mississippi. As of December 31, 2009, it had 15 branches located throughout Harrison, Hancock, Jackson, and Stone Counties. It has 47 automated teller machines (ATM) at its main office, all branch locations and at various non-proprietary locations.

Products and Services

The company's primary lending focus is to offer business, commercial, real estate, construction, personal, and installment loans, with an emphasis on commercial lending.

The company's deposit services include interest bearing and non-interest bearing checking accounts, savings accounts, certificates of deposit, and IRA accounts. It also offers a non-deposit funds management account. It provides depository accounts to individuals and small and middle market businesses in its trade area.

The company's asset management and trust services department offers personal trust, agencies and estate services, including living and testamentary trusts, executorships, guardianships, and conservatorships. Benefit accounts maintained by the department primarily include self-directed individual retirement accounts. Escrow management, stock transfer, and bond paying agency accounts are available to corporate customers.

The company also offers various other services, including safe deposit box rental, wire transfer services, night drop facilities, collection services, cash management, and Internet banking. It is a member of the PULSE network. The company also provides services to customers representing various industries, including seafood, retail, hospitality, hotel/motel, gaming, and construction.

Loan Portfolio

As of December 31, 2009, the company's loan portfolio included real estate, construction loans; real estate mortgage loans; loans to finance agricultural production; commercial and industrial loans; loans to individuals for household, family and other consumer expenditures; obligations of states and political subdivisions; and other loans.

Investment Portfolio

As on December 31, 2009, the company's investment portfolio included the U. S. treasury, U.S. government agency, and mortgage-backed securities; states and political subdivisions; and other securities.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
