Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Pep Boys - Manny, Moe & Jack business.

About Pep Boys - Manny, Moe & Jack

The Pep Boys—Manny, Moe & Jack offers automotive service, tires, parts, and accessories. The company's primary operating unit is its Supercenter format, which serves both 'do-it-for-me' (DIFM, which includes service labor, installed merchandise and tires) and 'do-it-yourself' (DIY, or retail) customers.

As of January 30, 2010, the company operated its stores in 35 states and Puerto Rico. It operates approximately 11,686,000 of gross square feet of retail space, including service bays.

Services and Products

The company operates a total of 6,027 service bays in 578 of its 587 locations. Each service location performs a range of automotive repair and maintenance services (except body work) and installs tires, hard parts and accessories.

Each Pep Boys Supercenter and Pep Express store carries a similar product line, with variations based on the number and type of cars in the markets where the store is located, while a Pep Boys Service & Tire Center carries tires and a limited selection of other products. A complement of inventory at a typical Supercenter includes an average

of approximately 25,000 items, while Service & Tire Centers average approximately 4,000 items.

The company's product lines include tires (not stocked at Pep Express stores); batteries; new and remanufactured parts for domestic and import vehicles; chemicals and maintenance items; fashion, electronic, and performance accessories; and a limited amount of select non-automotive merchandise that appeals to automotive 'Do-It-Yourself' customers, such as generators, power tools, personal transportation products, and canopies.

The company also sells an array of products under various private label names. It sells tires under the names DEFINITY, FUTURA and CORNELL, and batteries under the name PROSTART. The company also sells wheel covers under the name FUTURA; water pumps and cooling system parts under the name PROCOOL; air filters, anti-freeze, chemicals, cv axles, lubricants, oil, oil filters, oil treatments, transmission fluids, wheel rims and wiper blades under the name PROLINE; alternators, battery booster packs, alkaline type batteries and starters under the name PROSTART; power steering hoses, chassis parts and power steering pumps under the name PROSTEER; brakes under the name PROSTOP and brakes, starters, and ignitions under the name VALUEGRADE.

The company's commercial automotive parts delivery program is branded as PEP EXPRESS PARTS. As of January 30, 2010, approximately 80% or 451 of the company's 562 Supercenters and Pep Express stores provided commercial parts delivery. The company's automotive audio product lines include radios, speakers, amplifiers, remote starters and alarm systems from various brands.

History

The Pep Boys—Manny, Moe & Jack was founded in 1921.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
